PART 1

MEASURING THE IMPACT OF PUBLIC ACT 511

PART 1

MEASURING THE IMPACT OF PUBLIC ACT 511

INTRODUCTION

As explained in section 8.4 of the Community Corrections Act (Public Act 511), the purpose of the Act is to encourage the participation in community corrections programs of offenders who would likely be sentenced to imprisonment in a state correctional facility or jail, given they do not have a criminal record that indicates a pattern of violent offenses, have not demonstrated a pattern of violent behavior, and would not increase the risk to public safety.

In section 12, the Act requires that the Office of Community Corrections report biannually as to the effectiveness of community corrections programs and comprehensive plans funded under the Act; and it requires that the report include an explanation of how the rate of commitment of prisoners to the state prison system has been affected.

PRISON COMMITMENTS

The annual prison intakes and returns increased from 1994 to 1998, but are down for 1999. Table 1 shows the total intakes and returns from 1994 through 1999 with data from the CMIS data base. The prison intake and returns in the table include new court commitments, probation violators (technical and new sentence), parole violators with new sentences, and escapees with new sentences and parole violators with technical violations. The trends over the last six years indicate:

- The annual increases are not the result of new court commitments.

The new court commitments continue to decline each year. New court commitments accounted for almost 4,400 intakes for 1999, and this is the lowest number since 1994. Other departmental analysis indicates that only about 1/3 of these offenders were sentenced under the new legislative guidelines. The new guidelines only effected a portion of the new court commitments in 1999.

- The largest proportion of intakes and returns were from offenders on probation or parole.

In 1999, these two groups accounted for almost 7,600 intakes and returns. Offenders on probation or parole include 63% of the total for the year.

- The data on prison intakes and returns continue to support the state board priorities and policies.

Table 1

Prison Intakes and Returns						
	Fiscal Year					
Type of Intake and Return	1994	1995	1996	1997	1998	1999*
New Court Commitments	5,680	5,160	5,090	5,151	4,948	4,414
Probation violators	1,932	2,617	3,046	3,154	3,131	3,136
Parole violators - New sentence	1,233	890	1,033	1,288	1,345	1,254
Parole violators - technical viol.	1,964	1,916	2,577	2,668	3,109	3,186
Total – Intake and Returns [2]	10,809	10,583	11,746	12,261	12,533	11,990
Total – Intake Only[1]	8,845	8,667	9,169	9,593	9,424	8,804
Probation and Parole	5,129	5,423	6,656	7,110	7,585	7,576
Percentage: new commitments to total intake and returns	53%	49%	43%	42%	39%	37%

[1] Prison intake includes new court commitments, probation violators (technical and new sentence), parole violators with new sentences, and escapers with new sentences.

[2] Prison intake and returns include new court commitments, probation violators (technical and new sentence), parole violators with new sentences, and escapers with new sentences, and parole violators that are technical violations.

* Preliminary data

Figure 1

The data on prison intakes and returns show that the focus of treatment programs needs to be on reducing recidivism. The emphasis must go beyond simply diverting offenders into alternatives, and also impact the longer term goal of reducing recidivism. Research on treatment programs that are effective in reducing recidivism indicate that programs are more effective for offenders with higher risk of recidivism. Higher risk is indicated by an offender's criminal history; offenders convicted of previous felonies indicate a higher risk. Offenders already on probation and parole with violations also fall into the higher risk classification.

The priorities for FY2000 and review of FY2001 proposals emphasize an increased focus on higher risk of recidivism cases.

The priorities also emphasize strengthening education, employability, and job retention programs and cognitively based programming.

SUMMARY OF COURT DISPOSITION DATA

This report provides data from the court disposition data base that are indicators of the degree to which community based policies, sanctions and services have had an impact on the prison commitment rate and the overall pattern of felony dispositions in Michigan. The data reveals that:

- The vast majority (more than 75%) of felons continue to be sentenced to community-based sanctions.

Approximately one out of three felons continue to be sentenced to straight probation.

Approximately one out of four continue to receive split sentences (jail and probation) – indicative of the continued use of combinations of jail and other forms of supervision as an alternative to prison.

- Michigan's prison commitment rate decreased on an annual basis from 1993 to 1995, from 25% to 22%. In 1996 it edged up and remained at 23%, with the exception of 1998 when it returned to 22%.
- The total number of offenders sentenced to prison in 1993 totaled approximately 9,400. Since then that level has stayed in the eight thousands, with the exception of 1997 when it climbed to approximately 9,100.
- The number of sentenced offenders with SGL minimum minimum scores of 0 account for approximately 45% of the total number of offenders in 1998; the prison commitment rate for this group has been 6% since 1996.
- Offenders with prior felony convictions are most likely to be eligible for participation in PA 511 funded programs, and data show from 1992 through 1995 the approximate prison commitment rate for these offenders decreased from 49% to 37%. Although the rate increased somewhat during 1996 and 1997, it has since returned to approximately 37%.

Overall Prison Commitment Rate.

Figure 2 illustrates the change in the overall prison commitment rate when only the most serious disposition for each offender is considered (dispositions where the offender was in prison at the time of conviction and convictions on escape charges are excluded).

Figure 2

Overall Prison Commitment Rate and Number of Prior Felony Convictions.

Changes in prison commitment rates have not been uniform for all groups of offenders. For instance, as shown in Figure 2, the decrease has been greater for offenders with prior felonies. While the decrease was greatest from 1992 to 1995, most recent data show the prison commitment rate for felons with one prior has continued to decrease.

Figure 3

Discussion: Prior Felony Convictions and Targeting for PA 511 Eligibility.

The decrease in prison commitments can be attributed to a variety and combination of factors: changes in probation agents' sentencing recommendations, increased availability of community-based sanctions and services, changes in public opinion and in the philosophy of various participants in the criminal justice system, etc. Some, but certainly not all, of these factors are the result of Public Act 511--both through the discussion and public education functions of the Community Corrections Advisory Boards and through programs made available by funding from the Department of Corrections/Office of Community Corrections.

From its beginning, OCC has placed a strong emphasis on the use of historical data for establishing target populations and determining offender eligibility for participation in OCC-funded programs. In order to avoid net-widening, it is important to determine that an offender would historically have received a prison or jail sentence. One item of available data which has frequently been used by CCABs to establish eligibility is whether an offender has prior felony convictions. Thus, it is important to note that, **those offender groups most likely to be eligible for participation in PA 511 funded programs--i.e., those offenders with prior felony convictions---showed the greatest decrease in prison commitment rates.** The greatest change for this group occurred in the first part of the 1990's as policies and programs were developed and implemented pursuant to local comprehensive corrections plans and P.A. 511 objectives and priorities.

Appendices: County-specific Felony Conviction Data.

Appendix A presents overall felony disposition data. Appendix B presents a detailed breakdown of prison commitment data by SGL category. Appendix C only displays data from a single year, but it combines disposition data with SGL category. Appendices A and B provide sentencing data for calendar years 1993, 1994, 1995, 1996, 1997, 1998, and January through May of 1999. Appendix C presents most-recently-available felony disposition data, and covers January through May of 1999.

The tables in these appendices present both statewide totals and data for each county. The original data source is the MDOC Court Disposition data base. From this data base, an offender data base is extracted which reflects only the single most serious disposition for each offender during each reporting period. Individuals are identified by Social Security Number (SSN) where available, otherwise by State Police Identification (SID) number or name where necessary. After excluding records for Offenders In-Prison, Escapees, and Offenders on Delayed Sentence, at the time of offense, the most significant record/disposition for each offender is chosen. Factors utilized to select the most significant record/disposition include:

1. Disposition type (prison, jail, probation, other).
2. Mandatory over non-mandatory sentence.
3. Longest length of maximum term allowed.

PART 2

**JAIL UTILIZATION
CALENDAR YEARS
1998 AND 1999**

JAIL UTILIZATION CALENDAR YEARS 1998 AND 1999

For the calendar year of 1999, 76 of Michigan's 81 counties with jails electronically transmitted jail utilization and inmate profile data to the State. Collectively the county inputs comprise the Jail Population Information System (JPIS).

One of the stated purposes of JPIS is to provide information to support coherent policy making. Using this data, the State and CCABs can track jail utilization, study utilization trends, examine characteristics of offenders being sent to jail, and evaluate specific factors affecting jail utilization. Results of such analyses permit formulation of objectives to improve utilization (such as reduction in jail crowding, changing the profiles of the inmate population and reducing in the average length of stay for different types of groups of inmates) and enable the assessment of the impacts and effectiveness of policies, practice, procedures or programming, which have been established to address objectives.

This part of the biannual report is designed to supply a report which summarizes primary categories of the JPIS data, together with an overview of the report.

The summary report covering data reported during calendar years 1998 and 1999, on both a state-wide and county basis, is shown in Appendix D. The report indicates: average daily populations by type of offenders utilizing the jails, average lengths of stay, and the numbers of the releases upon which lengths of stay are based.

The explanation sheet, immediately below, explains how the report fields are derived. An overview of the summary report follows the explanation sheet.

JPIS Report Data Explanation Sheet

REPORT CONTENT

County versus Statewide Sections

To show occupancy levels at jails, the “Boarded In” figures in county sections of the report include offenders boarded in from other jails as well as State and Federal boarders; and “Boarded Out” offenders are listed separately. In the Statewide section, (“All Electronically Reporting Counties”) the counts from “Boarded Out” are not shown separately, rather they are included in the Sentenced Felon and Sentenced Misdemeanant counts. Attendantly, the “Boarded Out” counts are excluded from the Statewide “Boarded In” figures, so they are not “double counted.”

COMPUTATION DETAIL

Average Daily Population (ADP)

ADP figures are computed by summing (category by category) the number of days each reported offender has spent in jail during each reported month, and then dividing those sums by the total number of days in the reported months.

Percentage of Average Daily Population (% of ADP)

In the report that is a part of the cover letter for this mailing, figures in the column “% of ADP” are computed as a percent of the total number of housed offenders under the county’s responsibility, including those boarded out in other jails. In the “Audit Report” (sent only to the jails for data verification), the monthly ADP percentages are computed as a percent of the number of offenders housed in the jail. (Those boarded out are accounted for separately at the end of the report.)

The Average Length of Stay (ALOS)

ALOS figures are computed by summing (category by category) the lengths of stay of offenders released in the period which the averages cover and then dividing those sums by the number of offenders released in those respective categories during the same time period.

Releases (Rels)

The Rels column displays the numbers of released offenders included in each Average Length of Stay (ALOS) computation.

Note:

In both ADP and ALOS computations, the days summed only include records for which admit and release times indicate the offenders stayed overnight in jail.

DATA CATEGORIES

Legal Status

Sentenced

If an offender’s record has a sentence date, the offender is counted as *Sentenced*.

Unsentenced

Unsentenced includes Convicted and Pretrial.

Convicted:

If an offender’s record has a conviction date but no sentence date -- or if the convictions-count field is not zero -- the offender is counted as *Convicted*.

Pretrial:

If an offender’s record has no sentence date and no conviction date and the convictions-count field is zero, the offender is counted as *Pretrial*.

Crime Class

The categories *Felony*, *Misdemeanor*, *Federal*, and *Civil* are termed Crime Classes. In reports with divisions for only *Felons* and *Misdemeanants*, *Federal* offenders are included with *Felons* and *Civil* offenders are included with *Misdemeanants*. In audit reports prior to this (prior to October, 1999), this category reflected the offenders’ Crime Class at time of Arrest. This report reflects Crime Class at Time of Convection, as will similar reports, hereafter.

ADMISSION STATUS

Admission Status is a nine-option designation jails associate with each offender:

1. Regular Inmate, 2. Weekender, 3. Inmate on Temporary Hold, 4. Boarder from DOC, 5. Boarder for Feds, 6. Inmate to be Boarded Out, 7. Boarder from another County, 8. Inmate returned on Writs, and 9. Inmate on Temporary Hold for another county.

Reports total offenders by Crime Class, except for those that are categorized as *Boarded In* or *Other*.

Boarded In:

This category represents the combined total for offenders designated: Boarder from another County, Boarder from DOC, and Boarder for Feds

Other:

This category represents the combined total for offenders designated: Inmate on Temporary Hold, Inmate returned on Writs, and Inmate on Temporary Hold for another county.

OVERVIEW

The JPIS summary report shows the composition of the jail population in terms of felons and misdemeanants, sentenced and unsentenced status, as well as the number of inmates boarded out and boarded in the county jail. This report shows two years of data for the counties that have been reporting the entire period, otherwise the months covered in each year are listed on the report. The jail population is listed by the major categories of inmates housed in the county jail and inmates boarded out. For each inmate grouping, it lists the average daily population (ADP), the percentage of the average daily population represented by the total ADP reported, the average length of stay (at release), and the number of releases.

The data for calendar years 1998 and 1999 show the following:

- The 76 counties reporting accounted for an average of 16,058 of the jail beds in the state, during the period from January through December of 1999. As of December, 1999, these counties accounted for about 97% of the total jail beds in Michigan. Since not every county is included in the report and some of the reporting counties did not contribute data every month, the summary data from the report does not fully represent state figures or state totals; however it does provide a reasonable and useful representation of a mix of counties including urban, metropolitan and rural counties.
- The average daily population of the reporting jails was about 15,153, 94% of their rated capacity.
- Of the jails reporting electronically - - and not including offenders in an "other" classification such as "held on writ" or those who were boarded -- the following can be seen regarding offenders housed during January through December 1999. The number of housed felons averaged 8,763.5 and the number of housed misdemeanants averaged 4,960.8, and thus the felon to misdemeanant ratio was 64% to 36%. The ratio of housed offenders that were sentenced to those that were unsentenced was 48% to 52%.
- Of the inmates released during 1999 (not including inmates in boarded in status), there were about 16 thousand sentenced felons, 43 thousand sentenced misdemeanants 54 thousand unsentenced felons and 120 thousand unsentenced misdemeanants. The average length of stay for sentenced felons was almost 3.5 times longer than for the sentenced misdemeanants (about 78 days compared to 22 days). The average length of stay for unsentenced felons was 29 days compared to 5 days for unsentenced misdemeanants.

PART 3

**PROGRAM UTILIZATION DURING FISCAL YEAR 1999 AND
OCTOBER THRU DECEMBER OF FY 2000**

PART 3

PROGRAM UTILIZATION DURING FISCAL YEAR 1999 AND OCTOBER-DECEMBER 1999

SUMMARY

Part 2 of this report presented data/information regarding jail utilization during 1998 and 1999. Part 3 presents related information on individuals screened and determined eligible for participation in P.A. 511 programs and enrollments in community corrections programs during Fiscal Year 1999 and the first quarter of Fiscal Year 2000. Counts of individuals eligible represent an unduplicated count of offenders; the number of enrollments is greater than the number determined eligible because an offender can be enrolled in multiple programs.

October 1998 through September 1999 eligible offender data and program enrollment data submitted by local jurisdictions indicate the following:

- Over 24,600 individuals were determined to be eligible to participate in P.A. 511 programs during FY '99, as displayed in the summary table which follows. Sentenced felons were 64% of the total eligible to participate and 6.5% were unsentenced felons; 27.2% were sentenced misdemeanants and 2.4% were unsentenced misdemeanants. The data shows that this composition of eligible individuals was nearly unchanged from the previous fiscal year.
- There were almost 31,600 reported program enrollments during FY99; nearly 25,900 of the enrollments were in programs funded in whole or in part by state community corrections funds. This indicates a slight decrease in reported enrollments from FY98 when about 33,700 were reported.
- Felons account for the majority of enrollments in treatment programs and residential programs. Misdemeanants, meanwhile, were most often enrolled in community service programs. This is as expected considering community service programs are utilized extensively to reduce the misdemeanor population in the jails in order to increase the availability of jail beds for felons. In addition to the frequent use of substance abuse programs for sentenced felons, alternative funding sources were also utilized to extend these programs to a smaller but sizeable number of misdemeanants.
- Pretrial service programs have been implemented in several jurisdictions to expand utilization of conditional release options and decrease length of stay in jail of pretrial detainees. This serves as another means to increase the availability of jail beds for sentenced felons.

The attached tables present data on individuals determined eligible for P.A. 511 and program enrollments statewide. For data for each local Community Corrections Advisory Board jurisdiction, see: Appendix C for Statewide and County-Specific Felony Sentencing Data By SGL Category and Sentence Type; Appendix D for Jail Utilization Data - Calendar Years 1998 and 1999; Appendix E for Individuals Determined P.A. 511 Eligible During Fiscal Year 1999; Appendix F for Individuals Determined P.A. 511 Eligible During October 1999-December 1999; Appendix G for New CCAB Program Enrollments FY99 – All Funding Sources vs. Community Corrections Funding; and Appendix H for New CCAB Program Enrollments Oct 99 thru Dec 99 – All Funding Sources vs. Community Corrections Funding.

**Offenders Determined PA-511 Eligible
Summaries of FY 99 and Oct-Dec 99**

FY 99

	Unsentenced	Sentenced	Totals	
Felony	1,600	15,755	17,355	70%

PART 4

LOCAL COMPREHENSIVE PLANS

AND

AWARDS OF FUNDS

PART 4A

IMPLEMENTATION OF LOCAL COMPREHENSIVE PLANS

PART 4A-1

LOCAL COMPREHENSIVE CORRECTIONS PLANS

BY CCAB/COUNTY

FY 2000 STATUS

Table **4A-1** presents the status of each county's participation in the implementation of the Community Corrections Act, the award of FY 2000 Community Corrections Plans and Services and Probation Residential Services Funds to date and pertinent data/information regarding prison commitment rates, jail utilization, FY 2000 objectives, etc. Information includes issues which have surfaced during the year and plan modifications or actions which have been or are being taken to improve impact or performance.

Specific sanctions and services supported by community corrections funds vary from community to community depending upon local needs and priorities. While the variations exist, programs/services which are common throughout the state include: community service programs; substance abuse assessment and treatment; employment related services; and jail based offender screening services.

COMPREHENSIVE CORRECTIONS PLANS
FISCAL YEAR 1999-2000
AWARD OF FUNDS

TABLE 4A-1

CCAB	FY 2000 AWARD OF FUNDS		FY 2000 STATUS	ISSUES AND/OR NOTES
	COMPREHENSIVE PLANS AND SERVICES	PROBATION RESIDENTIAL SERVICES		
Barry/Allegan	157,644	78,690	<p>The overall prison commitment rate in Barry County was 45% in 1994 but decreased to 19% by 1997 and 1998. County data indicates the FY 99 rate was 13% and YTD FY 2000 it is 19%. The Allegan County prison commitment rate was 29% in 1998; 27% in 1999 and 29% YTD FY 2000. Dispositions have increased each year 25% to 30% for the last four years in Allegan. The Barry County jail continues to operate well under capacity while the Allegan County jail is operating at or over capacity with the number of beds rented to other jurisdictions significantly reduced. PRS utilization for the two counties combined is under expected level (authorized daily population 5; actual daily population 2). Previous underutilization of community service in Allegan has been addressed and program enrollments are at or above expected levels. Barry County has completed design and implementation of a computer based educational program. Use of the program in the jail has begun.</p>	<p>Population and disposition increases in Allegan County have resulted in increased jail crowding. Policies and procedures to promote increased use of sentencing alternatives need to be strengthened by the CCAB.</p> <p>The overall prison commitment rate remains above statewide averages in Allegan county.</p> <p>PRS utilization is below expected levels.</p>

CCAB	FY 2000 AWARD OF FUNDS		FY 2000 STATUS	ISSUES AND/OR NOTES
	COMPREHENSIVE PLANS AND SERVICES	PROBATION RESIDENTIAL SERVICES		

Bay	145,320	78,690	<p>The overall prison commitment rate declining: 30% for calendar year 1998 , 28% for FY 1999, and 20% YTD FY 2000. The jail continues to operate under the rated capacity and boards in offenders from other jurisdictions (approximately 12%). CCAB has developed new procedures for obtaining substance abuse assessments from a local provider with review by the CDR and utilizing community based funding sources for treatment where appropriate. New procedures have resulted in increased program participation in outpatient and residential substance abuse services and increased utilization of community based funding resources. Computer based educational program just getting underway after early delays in implementation schedule due to equipment procurement/installation and teacher training. Implementation of cognitive based programming to take place during 3rd and 4th quarters.</p>	<p>Low utilization of ODCP grant for monitoring and testing; program was established primarily for monitoring/testing probation violators.</p> <p>County is reviewing targeting and eligibility issues with intent to re-focus resources on higher risk offenders while developing community based and fee based support of services for lower risk offenders.</p>
Berrien	153,640	236,070	<p>The prison commitment rate decreased from 38% in 1997, to 29% in 1998 , to 23% in FY 1999, and to 20% YTD FY 2000. Jail crowding has become an issue again in FY 2000. The ALOS of sentenced felons increased from 57 days to 82 days during 1999. CJRP claims have increased. The pretrial population of unsentenced felons has also increased from 7% of the ADP in 1999 to 29% of the ADP in FY 2000. FOC offenders generally occupy approximately 10 beds in the jail and the JPM reviews cases to facilitate alternative resolutions. PRS utilization has continued to increase. The CCAB is currently maintaining an FY 2000 ADP at or over 18. Utilization of electronic monitoring has increased during FY 2000.</p>	<p>The CCAB is in the process of reviewing characteristics of the pretrial population to determine appropriate alternatives and/or revisions in policies and procedures to address the population increase in the jail..</p> <p>Support for developing a PRS facility in the county has increased. The CCAB is facilitating development of a specific implementation plan targeting program start up for FY 2001.</p>

CCAB	FY 2000 AWARD OF FUNDS		FY 2000 STATUS	ISSUES AND/OR NOTES
	COMPREHENSIVE PLANS AND SERVICES	PROBATION RESIDENTIAL SERVICES		

Branch			County established a CCAB in the early 90's; CCAB was disbanded in 1993. During FY 97 County officials expressed interest in re-establishing the CCAB. OCC provided information to County regarding alternative sanctions and services and process for modifying previous comprehensive plan and the preparation and submittal of a proposal and application for funds. The prison commitment rate was 17.5% (21 of 120) in 1996 and 12% (16 of 132) during 1997 and 16% (16 of 101) during January-September 1998.	OCC will continue to offer assistance upon request to County regarding preparation and submittal of updated County plan.
Calhoun	211,700	330,498	Downward trend in overall prison commitment rate and rates for various SGL and offense categories. Overall prison commitment rate of 19% during 1998 compares to 22% for 1997, 26% for 1996, and 27% for 1995. Rate for felony offenders with SGL Min/Min of 0 decreased from 11% in 1995 to 7% during 1996 and 1997 to 4% during 1998. Commitment rate for offenders with SGL Min/Min 12 remained above the state rate: 72% in 1995; 64% in 1996; and 66% during 1997 and 54% during 1998. Jail has rated design capacity of 600; 1998 ADP was 569, 159 were boarders. Utilization of residential services and day reporting now at or near capacity (utilization during FY 98 and 99 lower than expected).	During first five months of FY 2000, the CCAB placed emphases on reorganization; a new CCAB manager was hired; the CCAB office and support services provider relocated; and a new residential services provider began operations in the former MDOC correction center. Jail population strategies implemented or under development to reduce intake or length of stay of Calhoun County inmates and expedite enrollment/placement of inmates in nonincarcerative programming and supervision. The NEEDS assessment instrument has been implemented to assist in the identification of offenders who may be eligible for P.A. 511 services.
Cass	75,140		The overall prison commitment rate was 20% in FY 1999 and 21% YTD FY 2000. Rate for Min/Max of 18 remains low - 3% in FY 1999 and 2% YTD FY 2000. Jail continues to operate at capacity while boarding in inmates from other jurisdictions. Sheriff's Employment placement program continuing to expand. County will be implementing substance abuse cognitive change program during remainder of FY 2000.	County interested in developing in jail computer assisted educational program. Plans for FY 2001 will be developed in conjunction with school district. Current GED program has difficulty addressing low level learners.

CCAB	FY 2000 AWARD OF FUNDS		FY 2000 STATUS	ISSUES AND/OR NOTES
	COMPREHENSIVE PLANS AND SERVICES	PROBATION RESIDENTIAL SERVICES		

Central UP (1)	78,217		Prison commitment rates continue to be low: less than 10% during 1997 and 1998. Jail population has increased in both jails but overcrowding has not occurred. Community corrections funds utilized primarily for community service program. Electronic monitoring use has increased for pretrial offenders. The CCAB and Circuit Court Probation continue to make use of a wide range of local programming.	Prison Commitment, jail utilization and program utilization objectives are being achieved. Additionally, the CCAB has taken on the County's vehicle immobilization program to increase revenue for the community service program.
Clare/Gladwin			Clare County prison commitment rate below state rate. Gladwin prison commitment rates below state rates.	CCAB formed but limited activity since 1991.
Clinton	77,000		The overall prison commitment rate declined from 32% in 1998, to 30% in 1999 and 28% YTD FY 2000. Min/Max of 18 prison commitment rate increased from 8% (6 of 70) in 1998 to 15% (8 of 54) in FY 1999 and 12% (5 of 39) YTD FY 2000. The jail continues to be utilized at capacity with approximately half of the inmates being boarded in from other jurisdictions. County is continuing to increase use of structured sentencing and use of available alternatives including PRS and electronic monitoring.	The prison commitment rate for SGL Min/Max 18 has increased due in part to departures from the sentencing guidelines; increased emphasis needs to be placed on utilization of jail and other available local sentencing alternatives for this population. Moreover, targeting and eligibility should be updated to increase use community corrections resources for higher risk offenders.

CCAB	FY 2000 AWARD OF FUNDS		FY 2000 STATUS	ISSUES AND/OR NOTES
	COMPREHENSIVE PLANS AND SERVICES	PROBATION RESIDENTIAL SERVICES		

Eastern UP (2)	127,000		Overall prison commitment rates for the region below state rates: 17% in 1995; 12% in 1996; 22% in 1997 23% in 1998 and 11% in 1999. 1999 rates for Man/Del <50 grams 0%. OUIL III's 12%. SGL Min/Min 12 are 0%. ADP of jails at or near rated design capacity. Policy and program plan provides for conditional release for pretrial detainees and earned release for sentenced inmates to assure availability of jail beds for sentenced felons. The region relies on the utilization of a wide variety of local resources for provision of substance abuse treatment, employment, and educational services. There has been an increase in utilization of the electronic monitoring and community service programs.	<p>Policy and program plan continues emphases on: maintaining low commitment rates; and reducing admissions to and length of stay in jail of pretrial detainees and misdemeanants.</p> <p>Limited space for housing female offenders.</p> <p>Chippewa County was awarded FY 98 Local Facility Expansion Program funds to increase jail beds. The new beds are anticipated to come on line by December 31, 2000.</p>
Eaton	149,565	62,952	The overall prison commitment rate historically has been under the state average: 16% in 1998; 18% in FY 1999; and 18% YTD FY 2000. To date FY 2000 the county has sent 1 out of 87 offenders with SGL Min/Max of 18 or less to prison. The jail continues to operate under the rated capacity and the county rent beds to other jurisdictions. County is revising approach to employment services and has initiated joint planning with Michigan Works to access employment services in the future. The county applied for and received a drug court grant to address the OUIL III population. A structured sentencing approach will be utilized with jail time limited to 90 days or less followed by treatment and other appropriate alternatives. The county is planning to utilize a risk/needs assessment tool in implementation of new drug court program and in conjunction with other P.A. 511 programs. PRS utilization is at expected levels.	Utilization of existing employment and cognitive programs is lower than expected during FY 2000 due to staff vacancies and jail construction/space issues. The CCAB is in the process of contracting and re-structuring services.

CCAB	FY 2000 AWARD OF FUNDS		FY 2000 STATUS	ISSUES AND/OR NOTES
	COMPREHENSIVE PLANS AND SERVICES	PROBATION RESIDENTIAL SERVICES		

Genesee	434,000	1,133,136	<p>The October 1999-February 2000 FY 2000 overall prison commitment rate reported by the County was 34%. This compares to 40% in 1996, 33% in 1997, and 38% in 1998. The October 1999-February 2000 prison commitment rates for several priority population groups are higher than expectations: SGL Min/Max 18 or less - 13%; straddle cells - 67%; probation violators - 34%. Factors which contribute to this somewhat unusual pattern include but are not limited to: long established practice of diverting many lower level felons from felony prosecution through practice of charging these individuals under local ordinances or misdemeanor charges; jail crowding; a high degree of consistency between agent recommendations and sentences imposed.</p> <p>The jail has historically been crowded and county continues to monitor and upgrade policies, practices and programming to improve population management. 100 bed work release facility (financed in part with Local Facility Expansion Program funds) opened in January 2000.</p> <p>Programming options have been expanded, e.g. in jail substance abuse treatment has been implemented; education programming through Invest Learning is being expended; and modifications in target populations for day reporting and other programs have been or are being implemented.</p>	<p>The overall prison commitment rates and rates for SGL Min/Max 18 or less and probation violators continue to be higher than expectations.</p> <p>Utilization of probation residential services is extensive while utilization of day reporting remains lower than expected. County needs to re-examine target populations and program specific eligibility criteria for the residential services and day reporting programs and reaffirm priorities for placement, length of stay and linkages between the residential and day reporting programs. Increased emphasis needs to be on controlling the ADP in the residential program through prioritizing intake (higher risk of recidivism cases) and reducing length of stay in residence through enrollment in day reporting.</p> <p>County should also re-examine all targeting policies and program specific eligibility criteria with the intent to refocus community corrections resources on higher risk offenders while developing other community based and/or fee based support for services for lower risk of recidivism offenders.</p>
---------	---------	-----------	--	---

CCAB	FY 2000 AWARD OF FUNDS		FY 2000 STATUS	ISSUES AND/OR NOTES
	COMPREHENSIVE PLANS AND SERVICES	PROBATION RESIDENTIAL SERVICES		

Gratiot			<p>Overall prison commitment rate was 33% in 1995, 27% in 1996 and 1997 and 29% during 1998. Commitment rate for offenders with SGL Min/Max 18 was 14% in 1997 and 8% in 1998; rate for SGL Min/Min 0 was 15% in 1997 and 4% for 1998. High reliance on incarceration (jail and prison) for felony offenders; 0% sentenced to straight probation in 1998 as compared to 33% for the state. Jail has rated design capacity of 70. County boards inmates in other jurisdictions. Jail crowding and need to board out inmates virtually assured considering sentencing practices.</p>	<p>CCAB not active during FY 99; no expenditures of awarded funds. OCC continued to meet with various county officials to re-assess approach and determine county's interest revising CCAB plan. Circuit Court interested in focusing on substance abuse treatment options.</p> <p>No FY 2000 proposal/application for funds submitted by County.</p>
Hillsdale			<p>Prison commitment rate of 49% was the highest among Michigan's counties during 1998. It is logical then that the rates would be high for virtually all SGL and offense categories. Lower guideline offenders have historically accounted for the majority of dispositions in the County (e.g., more than 58% of the dispositions are for offenders with SGL min/min of 0; this compares to 48% for the state; the 1998 prison commitment rate of 33% for this group is more than 5 times the state rate). The rate of incarceration for felony offenders (99%) is the highest among Michigan counties and the available data suggests the use of incarceration has increased since November, 1996. While the rate of incarceration has not changed since November of 1996, length of stay of jail inmates has increased and the ADP of inmates from Hillsdale has increased.</p>	<p>No CCAB. There were several meetings during FY 97 and early FY 98 with county officials regarding creation of a CCAB and development of a local plan. Lack of follow up by County; OCC will continue to work with the County.</p> <p>Given the sentencing patterns within the County, it has been expected that the new sentencing guidelines will have major impacts on local system. Actual impacts will be reviewed as 1999 and 2000 felony disposition data becomes available.</p>

CCAB	FY 2000 AWARD OF FUNDS		FY 2000 STATUS	ISSUES AND/OR NOTES
	COMPREHENSIVE PLANS AND SERVICES	PROBATION RESIDENTIAL SERVICES		

Huron	66,812		Overall prison commitment rate of 21% in 1995, 15% in 1996, 22% in 1997, 23% in 1998, and 16% October 1999 to February 2000. Rated design capacity of the jail is 65; County continues to board inmates from other jurisdictions (19% of the jail's population at mid year). County established a pilot project in FY 98 for OUIL offenders with multiple priors: prosecuted as misdemeanants, focus on sanctions and treatment within the community--short term residential followed by release to day reporting and outpatient. Objectives were to minimize sentences as OUIL IIIs and pay costs through third party billings and offender fees. During FY 2000 there have been four OUIL 3rds all have been kept locally.	<p>The county is currently evaluating the effectiveness of the Residential Substance Abuse Treatment Program. At mid-year two of the four OUIL 3rds that had received residential substance treatment were enrolled in substance abuse treatment again. Award of funds for substance abuse treatment utilized to finance gaps between costs and revenues generated from third party billing and other sources.</p> <p>The in-jail substance abuse program has exceeded utilization expectations. Day reporting program continues to generate sufficient revenue from offender fees to be self supporting.</p>
Ingham County/Lansing	286,275	550,830	The overall prison commitment rate declined from 26% in 1997 and 1998, to 22% in FY 1999 and YTD FY 2000 18%. YTD FY 2000 rate for straddle cell offenders is 22% and the OUIL III rate 17%. The County continues to rent beds to the State, jail overcrowding has decreased; no emergency early releases have occurred YTD FY 2000. Recommendations resulting from the system mapping process are being pursued including re-structuring of the county funded pretrial services program and use of automated case management technology. Local siting issues resolved and county is proceeding with plan to expand PRS capacity within the county. Current PRS utilization is 34 out of an authorized daily population of 35.	<p>The jail has not completed installation of a new jail management software, limiting the availability of current jail data for analysis.</p> <p>The county is working with Family Court to develop strategies for reducing the average daily population of FOC inmates. The county is pursuing options to utilize Michigan Works services to assist in addressing the FOC and other sub-populations in the jail.</p> <p>Underutilized capacity in employment, day reporting, and outpatient aftercare programs.</p>

CCAB	FY 2000 AWARD OF FUNDS		FY 2000 STATUS	ISSUES AND/OR NOTES
	COMPREHENSIVE PLANS AND SERVICES	PROBATION RESIDENTIAL SERVICES		

Isabella	84,818		<p>The overall prison commitment rate increased from 9% in 1998, to 16% in FY 1999, and 19% YTD FY 2000. The jail continues to operate at capacity with approximately 50% of beds rented out to other jurisdictions. The county has implemented cognitive change program in jail as planned and is utilizing a risk/ need assessment tool to assist in determining eligibility for appropriate programming. Program utilization in intensive supervision/electronic monitoring has increased significantly from the low level of utilization experienced during FY 1999. County is requesting budget increase for cognitive change aftercare program phase.</p>	<p>The county hired a new CCAB manager during FY 2000. To date the new manager has implemented new cognitive programs, use of risk/needs assessment, and strategies for additional fee based revenues to support CCAB efforts.</p>
Jackson	190,128	283,284	<p>The prison commitment rate October 1999 through February 2000 was 28%, 42% in 1998, 38% in 1997 and 29% in 1996. The SGL Min/Max ≤ 18 prison commitment rate decreased from 22% in 1998 to 5% in 1999 (10/210); the average PRV of the 10 sentenced to prison was 41. In 1999 74% of the straddle cell offenders were sentenced to prison; the average PRV of the straddle cell offenders sentenced to prison in 1999 was 55. In 1998 37% of the probation violators were sentenced to prison, in 1999 32% were sentenced to prison. The ADP of residential services Oct. through February 2000 was 17 an increase of 65% over the previous year. Although the jail continues to be crowded the ADP through Feb. 2000 was 193, the rated design capacity is 192. There were no overcrowding emergencies declared.</p>	<p>The recommendations by the committees established within the County to examine options to reduce jail crowding and prison admissions have begun to have some effect. There have been no overcrowding emergencies declared and prison admissions are declining.</p> <p>Genesis I a new residential program developed in Jackson has become operational; experiencing normal startup and growth issues.</p>

Kalamazoo	399,765	1,412,550	Overall prison commitment rate was 25% in 1996, 21% in 1997, and 20% in 1998. Rate for SGL Min/Max 18 or less was 7.3% in 1996, 4.4% in 1997, 3% in 1998 and 0% YTD FY 2000. The jail remains crowded with 2 overcrowding emergencies declared YTD FY 2000; pretrial population decreased from 51% during 1999 to 40% YTD FY 2000. County is reviewing a draft jail study recommendations and options to further reduce the pretrial population. Through March PRS utilization is at expected levels. Drug court utilization is lower than expected.	<p>During the first half of FY 2000 the county has been dealing with a number of administrative issues including changes in CCAB management, changes in funding source and movement of the drug court under the administration of Circuit Court, and relocation of CCAB offices.</p> <p>Increased attention of other objectives, implementation of cognitive change programming and expanded use of risk/need assessment, will be pursued during the remainder of the FY 2000.</p>
-----------	---------	-----------	--	--

CCAB	FY 2000 AWARD OF FUNDS		FY 2000 STATUS	ISSUES AND/OR NOTES
	COMPREHENSIVE PLANS AND SERVICES	PROBATION RESIDENTIAL SERVICES		

Kent	739,800	1,416,420	<p>The overall prison commitment rate declined from 26% in 1998, to 21% in 1999, and 22% YTD 2000. Total overall number of dispositions have decreased by approximately 15% to 20%; the percent of offenders with SGL Min/Max of 18 or less (intermediate sanction cell/lock out) range has nearly doubled. Despite the increase in the proportionate size of the population, the prison commitment rate for SGLs Min/Max 18 or less is 4.7% YTD FY 2000 compared to 5.1% in CY 1998 and 3.9% in FY 1999. Also, the number of felony probation violators who are re-sentenced has increased significantly (nearly doubled) but the percent of violators being sent to prison has decreased from 42% at mid-year FY 1999 to 27% at mid-year FY 2000. The OUIL III prison commitment rate has been reduced from 40% in 1995, to 30% in 1998, 27% in FY 1999. YTD FY 2000 rate is 34%. The jail continues to operate in congruence with the jail bed allocation plan.</p> <p>PRS utilization has increased to the authorized levels. The agreement between Alternative Directions and Jellema House to provide substance abuse residential treatment programming in available space at Alternative Directions has expanded the capacity of a needed alternative sentencing resource and contributed to the increased use of PRS.</p>	<p>Impact of the jail split sentence agreement (policy to utilize split sentences for offenders receiving sentences of 90 days or longer) continues to be under expected levels due in part to number of probation violators receiving jail sentences with probation revoked. Therefore, split sentences have not increased as planned and comprised 13% of dispositions in FY 1999, and 11% of dispositions YTD FY 2000. Conversely, the percent of straight jail sentences has not declined but increased from 22% in FY 1999 to 30% in YTD FY 2000.</p> <p>The County continues to review characteristics of the probation violators being sent to prison and jail and review strategies to increase use of CCAB resources to address this population.</p>

	COMPREHENSIVE PLANS AND SERVICES	PROBATION RESIDENTIAL SERVICES		

Lake	35,049		<p>The overall prison commitment rate October 1999 - March 2000 was 13%, OUIL III 23%, SGL Min/Min 12 12% probation violators 33%. Lake County jail renovation project will increase the rated design capacity to 47. The jail is operating at less than 50% of the current 36 bed capacity. The ADP of felons has been low over the past several years. A goal of the county has been to reduce the misdemeanor population; the ADP of misdemeanants declined from 90% in 1997 to 75% in 1998, 51% in 1999 and currently 50%. The county utilizes a variety of local programs to augment CCAB funded programming including a cognitive change program for felons with multiple priors located at the Mason County Jail. Overall program utilization is at projections thus far this year. Policy and program plan being fully implemented.</p>	<p>Efforts continue to reduce the ADP and length of stay in jail of pretrial detainees, misdemeanants, and lower guideline felons and use of Cognitive change program in conjunction with Mason County.</p>
Lenawee			<p>Overall prison commitment rate among highest of Michigan counties: 47% in 1995; 47% in 1996; 42% during 1997 and 48% in 1998. Offenders with lower SGL guidelines account for the majority of the County's felony dispositions and an unusually large proportion of the County's prison commitments. Only 6% of felons were sentenced to straight probation during 1998; statewide 33% of felons are sentenced to straight probation. Rated design capacity of jail is 156; ADP was 165 in 1997 170 in 1998 and 1999.</p>	<p>OCC had several meetings with County officials during FY 96, FY' 97 and FY 98 relative to reactivating the CCAB, updating the County's comprehensive plan, and preparing a proposal and application for funds. Limited follow up by County.</p> <p>Given past sentencing practices, the new statutory guidelines are expected to have significant implications for and impacts on the County</p>

CCAB	FY 2000 AWARD OF FUNDS		FY 2000 STATUS	ISSUES AND/OR NOTES
	COMPREHENSIVE PLANS AND SERVICES	PROBATION RESIDENTIAL SERVICES		

Livingston			Prison commitment rate was 23% in 1994, 18% during 1995, 40% in 1996, 28% during 1997 and 24% during 1998. High prison commitment rates for low guidelines offenders (1996, 1997, and 1998 rates for SGL Min/Min of 0 and SGL Min/Max of 18 are double the state rates) and OUIL III rate was 80% in 1996, 64% in 1997 and 67% 1998. The rated design capacity of the Livingston County jail increased from 61 to 205 in September 1996. Jail was utilized to capacity shortly after the expansion.	CCAB established. Plan submitted to OCC in latter part of March 2000; to be presented to State Community Corrections Board for review on April 20, 2000.
Macomb	579,326	440,664	Historically, the county has had low prison commitment rates - 17% in 1997 and 1998; 15% in 1996; 16% in 1995; and 18% in 1994. Felony dispositions increased from roughly 2000 in 1995 and 1996 to approximately 2600 in 1998. County historically rented jail beds to the State and other jurisdictions; boarding in temporarily terminated in February 1998. 200 minimum security beds have been added to jail. The jail is now being operated at 86% of rated design capacity with an ADP of 47 boarders at the end of February 2000. Wide range of programming options utilized within the County.	County continues to place priority on utilizing community-based sanctions and services. Expansion of the jail population management policies and procedures has enabled the county to address the issues and reduce the number of inmates being jailed solely due to the inability to pay fines. Program utilization below expectation for community service and day reporting.

CCAB	FY 2000 AWARD OF FUNDS		FY 2000 STATUS	ISSUES AND/OR NOTES
	COMPREHENSIVE PLANS AND SERVICES	PROBATION RESIDENTIAL SERVICES		

Marquette	89,420	31,476	<p>Overall prison commitment rate was 15% in 1996, 16% in 1997, 11% in 1998 and 19% (11 of 59) during October 1999 - February 2000. Of the 11 sent to prison, 2 were scored under the new SGL's. 6 of the 59 dispositions were straddle cell offenses, 1 was sentenced to prison. The jail's RDC is 80 with a utilization rate historically of 90% or 72 offenders, for Jan - Feb 2000 the ADP has been 80. The unsentenced felon population has increased from 28% to 37%.</p> <p>County utilizes OCC funding primarily to support a jail-based case management function with emphasis on earned and early release options. Coordination and collaboration with the substance abuse coordinating agency and service providers have served to maintain access to assessment, treatment services and cost sharing among agencies.</p>	The unsentenced felony population continues to increase, while the Unsentenced Felon Program is not being utilized to reduce the ADP and decrease the ALOS. Rather than release to EMS or Day Report with programming, offender stays in jail, receives credit for time served at sentencing and then released. Emphases being placed on redevelopment of release-to options for UNS offenders with condition that at the time of sentence offenders receive day-for-day credit during program enrollment.
Mason	52,650		The prison commitment rate for the first five months of FY 2000 was 38% 21 of 55 offenders. This compares to rates of 16% in 1997 and 1998. The increase is attributed to an inordinate number of CSC and other presumptive prison offenses during the 5 month period. Jail overcrowding has been abated with the increase of 80 beds. The current jail rated design capacity is 110 beds. 52 of the additional jail beds were funded in part with a LFEP and Regional Jail Program funds. The expansion has facilitated the implementation of a 90 day in jail cognitive change program to serve multiple counties.	The focus of the County's comprehensive plan continues to be on reducing prison admissions through increasing the use of jail beds for sentenced felons, reducing jail beds used by pretrial detainees, and reducing length of stay for sentenced inmates. New jail beds are on line for use by the county and other jurisdictions; the regional jail cognitive change treatment program has been implemented and will be monitored/evaluated for replication in other jurisdictions.

CCAB	FY 2000 AWARD OF FUNDS		FY 2000 STATUS	ISSUES AND/OR NOTES
	COMPREHENSIVE PLANS AND SERVICES	PROBATION RESIDENTIAL SERVICES		

Mecosta	63,090		Prison commitment rate was 24% in 1995, 22% in 1996, and 19% in 1997, and 22% 1998, and FY 2000 YTD through February. Rate for SGL Min/Max 18 was 8% in 1997 and 4.2% in 1998; Min/Min 0 was 10% in 1997 and 4% in 1998. Very few (6% or less) felons sentenced to straight probation; jail utilized extensively. The jail has a rated capacity of 66. During the first five months of FY 2000, felons accounted for 59% of inmate.	The day reporting and pretrial services program are currently operating at 25% capacity. Efforts under way to increase use through revision of eligibility criteria policies and procedures. A revised bench book is also being developed to inform users of sanctions and services available.
Midland	127,724	62,952	Overall prison commitment rate during calendar year 1999 was 26%. Dispositions decreased from 376 in calendar year 1998 to 277 in 1999. The number of sentenced to prison also decreased from 93 in 1998 to 72 in 1999. October 1999 through January 2000 the overall prison commitment rate was 33%, straddle cell commitment rate 56%, presumptive prison commitment rate 89% and probation/parole violators 40%. Jail crowding continues; October 1999 through January 2000 ADP was 105.5 with 12.04 boarded out. Program utilization is near capacity, most of the out of jail programs are over utilized while the in jail programs are under utilized.	<p>The jail committee is constantly exploring options to reduce length of stay of jail inmates. Changing the mix of programming options, to further impact prison admissions and jail utilization, is continually under consideration.</p> <p>County received T. A. award from NIC to conduct an assessment of the criminal justice system. The assessment report has been completed and is to be presented to the County shortly. County also exploring options to increase jail capacity.</p> <p>Increased emphasis is being placed on need assessment and use of data/information derived from the assessments to guide treatment planning and case management functions.</p>

CCAB	FY 2000 AWARD OF FUNDS		FY 2000 STATUS	ISSUES AND/OR NOTES
	COMPREHENSIVE PLANS AND SERVICES	PROBATION RESIDENTIAL SERVICES		

Monroe	178,100	314,760	<p>Overall prison commitment rate increased from 29% in 1993, 30% in 1994 and 1995 to 34% in 1996 then decreased to 30% in 1997, 27% during 1998, 24.5% in 1999.</p> <p>High proportion of probation violators continue to be sentenced to prison. County was awarded Minimum Security Facilities funds to add 56 beds in the jail through double bunking; beds now in service. County also awarded Local Facility Expansion Program funds to finance a portion of the cost of a new 160 bed minimum security facility. Construction is underway with completion expected by July, 2000.</p> <p>Range of programming options has increased. Probation residential services have been expanded; facility formerly used by the MDOC for Community Residential Programs now used for PRS. Employment training and educational services accessed through Michigan Works. The county provided District Court services: pretrial services; fast track arraignment; day reporting; domestic violence prevention; conflict resolution; alcohol/substance abuse education; shoplifters education, and problem solving workshops.</p>	<p>Overall program participation is increasing and increased emphasis is being placed on program quality.</p> <p>It is evident that prison commitment rates including rates for probation violators can be further reduced by strengthening operational policies and procedures which determine how and when the various community-based sanctions and services are utilized.</p>
Montcalm/Ionia	140,000		<p>The overall prison commitment rate is 11% YTD FY 2000. Jail populations have been increasing during FY 2000. The Montcalm County jail is operating at or under capacity and the Ionia jail is at or over capacity. Utilization of community corrections programming to reduce length of stay of jail inmates has increased; program enrollments have increased in day reporting eliminating previous underutilization. Progress has been made in the participation of District Court in Ionia. CCAB is exploring options for fee based additional revenue to support expanded programming.</p>	<p>Jail crowding remains an issue in Ionia where day reporting is not utilized and District Court participation although improved is still low.</p> <p>Limited progress has been made in developing a specific strategy for use of community based employment services.</p>

Muskegon	233,942	566,568	<p>Overall prison commitment rate decreased from 50% in 1994 to 38% in 1997 to 33% in 1998. Rate for SGL Min/Min 0 decreased from 29% in 1994 to 19% in 1997 to 15% in 1998 (still 2 ½ times the state rate). Local Facility Expansion Program funds were awarded to County to assist with a 148 bed expansion project completed in April 1999.</p> <p>Program utilization, particularly PRS was lower than expected in 1999 but increased during FY 2000 YTD.</p>	<p>Modification in targeting/eligibility criteria and sentencing recommendation and probation violation processing can produce increased program utilization, increased utilization of combinations of jail and other community based programming and reductions in ADP and length of stay in jail for targeted offenders. It is also evident that modifications in the use of the various community based sanctions and services could contribute to further reduction in prison commitment rates.</p> <p>County is working toward implementation of policies and procedures to facilitate offender participation in the 90-day cognitive based substance abuse treatment program in Mason County and follow up treatment in Muskegon.</p>
Northern Michigan (3)	153,000	47,214	<p>FY 2000 prison commitment rate for the region through February 2000 was 26.6%. Jail crowding in Otsego County; Cheboygan and Crawford counties have available bed space for rent. Jail committees continue to meet with the CCAB working to standardize policies and procedures throughout the region.. NEEDS assessment tool is being used to provide improved recommendations for alternatives at the presentence phase. Increased emphasis being placed within sentencing recommendations and responses to probation violations on short terms in jail with release to programming.</p> <p>Cheboygan County awarded FY 98 Local Facility Expansion Program funds; 47 beds placed in service in 1999.</p>	<p>Cheboygan jail expansion has eliminated need to board inmates in other counties. Utilization of other sanctions (electronic monitoring, etc.) as means to reduce length of stay among jail inmates continue to be explored. Needs assessment tool is being utilized at pretrial. Implementation of a pilot cognitive restructuring program in Cheboygan County is being considered.</p> <p>A transition house is being established in Cheboygan County.</p>

CCAB	FY 2000 AWARD OF FUNDS		FY 2000 STATUS	ISSUES AND/OR NOTES
	COMPREHENSIVE PLANS AND SERVICES	PROBATION RESIDENTIAL SERVICES		

Northwest Michigan (4)	365,654	110,166	<p>The overall prison commitment rate remains higher than the state average; YTD 2000 is 25%. The rate for offenders with SGLs Min/Max of 12 or less is 7% (6 of 82) YTD FY 2000. The regional OUIL III rate is 25% YTD 2000. Jail space remains available region wide; only two counties are operating at or over capacity (Wexford and Missaukee). PRS utilization is slightly under authorized level YTD FY 2000. Other program enrollments are either near or over expected levels. Pretrial utilization has increased; pretrial policies were established in late FY 1998 but the option had not been previously utilized. Felony enrollments comprised 26% of the population in FY 1999 and 27% YTD FY 2000. The CCAB has made progress in implementing cognitive change and risk/need assessment pilots. Training has been provided in both areas with cognitive program start up and risk/needs assessment use scheduled for the third and fourth quarters. Jail construction is expected to be completed in Charlevoix by June 2000; County is working on an improved jail management plan.</p>	<p>Prison commitment rates, targeting and eligibility remain issues in NWMCOG. The prison commitment rate remains higher than the state average due to departures on offenders falling within the SGL Min/Max 18 or less. (Of the 6 offenders sent to prison with SGL Min/Max less than 12, four offenders had no prior felonies, one offender had one prior, and one offender had four priors. Three of these six departures came from Benzie/Manistee where the Min/Max 12 or less prison commitment rate has been historically high.)</p> <p>Completion of the risk/needs pilot this year should lead to updated targeting and eligibility policies and procedures for FY 2001 which facilitate addressing higher risk of recidivism offenders with P.A. 511 and community based resources.</p>
Newago			<p>No CCAB. Prison commitment rate less than 20%. Rated design capacity of jail is 212; 1999 ADP of 154. Approximately 51% of inmates are boarders from other jurisdictions.</p>	

CCAB	FY 2000 AWARD OF FUNDS		FY 2000 STATUS	ISSUES AND/OR NOTES
	COMPREHENSIVE PLANS AND SERVICES	PROBATION RESIDENTIAL SERVICES		

Oakland	1,447,131	1,416,420	<p>YTD FY 2000 overall prison commitment rate as reported by the county is 18%. This compares to 16% in 1996 and 17% in 1997 and 1998. Rates for offenders with SGL Min/Max of 12 or less, Min/Min of 12, OUIL III less than state rates. Rated design capacity of jail system is 1,665. Prior to 1998 County was routinely boarding more than 100 inmates per day in the jurisdictions. Since that time, County has and continues to implement strategies to reduce crowding; strategies have been having the intended effect and County's practice of boarding out offenders has been virtually eliminated.</p> <p>Wide range of programming options used within County. County has expanded and intensified pretrial program to further expedite conditional releases from jail. County is utilizing a risk/needs instrument to strengthen case planning and case management functions. The data/information derived from the assessments is being utilized within pretrial and is also shared with probation personnel to aid in the prep of the PSI and sentencing recommendations.</p> <p>County has committed to and is in the process of updating eligibility criteria. The net effect will be a reduction in the exclusions and an increased capability to focus on priority population groups.</p>	<p>County's ability to maintain relatively low prison commitment rates, address jail population issues, and meet program utilization objectives can be attributed to multiple factors including but not limited to: wide range of programming options; sentencing recommendation and probation violation processing guidelines which have been tailored/customized to support the County's objectives and characteristics; and a broad base of support among criminal justice practitioners and local governments.</p> <p>The anticipated modifications/updates in eligibility criteria in conjunction with the use of data/information derived from the risk/needs assessment are expected to strengthen the emphasis on priorities which have been adopted by the State Community Corrections Board and increase capabilities to achieve recidivism reduction through improving treatment effect.</p>
Oceana			<p>County developed comprehensive plan during 1994, but elected not to apply for program funds. Prison commitment rate 6% in 1995, 14% in 1996, 25% during 1997 and 14% during in 1998. Renting beds to other jurisdictions. No FY 95, 96, 97, 98, 99, or 2000 application.</p>	<p>Inquiries during early FY 2000 suggested renewed interest in County in updating plan and submitting a proposal and application for funds during FY 2000 or 2001 funds. No further follow up from County.</p>

CCAB	FY 2000 AWARD OF FUNDS		FY 2000 STATUS	ISSUES AND/OR NOTES
	COMPREHENSIVE PLANS AND SERVICES	PROBATION RESIDENTIAL SERVICES		

Osceola	49,500		Overall prison commitment rate was 9.5% in 1995, 20% in 1996, 31% 1997, and 21% in 1998, 17.6% 1999. The jail capacity increased to 77 during 1998. The county is boarding inmates in from other counties. Jail workcrew has yet to be activated, Pretrial, day reporting, and community service work programs in full operations.	Prison commitment rate objectives being met. Policy and program plan has been updated. Target populations, program design, policies and operational procedures updated.
Ottawa	213,070	94,428	Overall prison commitment rate Oct. through February 2000 was 13%. This is a continuation of the historical pattern (overall rate was 14% in 1996, 17% in 1997, and 12% in 1998; rates for virtually all SGL categories have been below the state rates). Jail annex completed in May 1999 increasing bed space by 162 beds. Programs utilized at 90% or more of capacity Emphasis placed on felony probation violators; during the first two months of CY 2000 there were 28 probation violators with 2 being sent to prison.	Impact of new sentencing guidelines has not been determined due to the small number of commitments. Updated probation violation response guide and processes have been implemented. Evaluation of Domestic Assault Intervention Program in process.
Saginaw	283,583	786,900	Overall prison commitment rate was 26% during 1997, and 29% in 1998. County reports an FY 2000 rate of 21% through February and a rate of 42.5% for those with guidelines in the straddle cell. The jail was expanded in 1995, January 1998, and March 1999; current rated design capacity is 513. Jail crowding has been alleviated and county is renting beds to other jurisdictions. Profiles of inmates have changed with sentenced felons accounting for 34% and sentenced misdemeanants accounting for 20% of the inmate population. The pretrial population accounts for 36% of the YTD CY 2000 ADP as compared to 47% in 1998. Planned changes in pretrial policies and procedures have been implemented and are having the intended effect on the jail population.	Progress continues to be made with respect to policies, procedures, and program design pertaining to the monitoring and supervision of pretrial detainees and sentenced offenders. Increased attention should be directed at increasing access to programming/treatment options through: strengthening linkages with various community organizations such as local school districts, Michigan Works, substance abuse treatment providers, and other local organizations; and new initiatives such as cognitive behavioral and increased education/employment programming.

CCAB	FY 2000 AWARD OF FUNDS		FY 2000 STATUS	ISSUES AND/OR NOTES
	COMPREHENSIVE PLANS AND SERVICES	PROBATION RESIDENTIAL SERVICES		

Sanilac	61,825		<p>FY 2000 prison commitments through February 2000 of 16% compares to 19% in 1997 and 17% in 1998. 6 of the 11 FY 2000 referrals to prison were for new offenses while on probation. Prison commitments for OUIL IIIs were 28%, SGL Min/Min 0 0% and Man/Del < 50 0%.</p> <p>The county jail has a rated capacity of 119; at mid-year the ADP was 86.2 with 26.1 being boarders . Program utilization at or near projections.</p>	Local objectives are being met. The County has expanded program options and implemented policies/procedures to provide earned release options for all offenders including those boarded in from other jurisdictions.
Shiawassee			<p>Prison commitment rate increased from 24% in 1995 to 28% in 1996 to 39% in 1997 then decreased to 31% in 1998. Commitment rates for SGL Min/Min 0, SGL Min/Max 12, OUIL III, and SGL Min/Min 12 above state rates.</p>	CCAB has been activated with intended purpose of developing a local comprehensive plan. It is expected that a local plan will be presented to the State Community Corrections Board during July or August of FY 2000.

CCAB	FY 2000 AWARD OF FUNDS		FY 2000 STATUS	ISSUES AND/OR NOTES
	COMPREHENSIVE PLANS AND SERVICES	PROBATION RESIDENTIAL SERVICES		

St. Clair	180,600	629,520	<p>Overall prison commitment rate was 23% in 1997, 25% in 1998, 19.1% for 1999, and 17.3% in the 1st quarter of FY 2000. The prison commitment rate for targeted OUIL III offenders has declined from 30% in 1998 to 20.5% currently. Straddle cell offenders in 1999 under the new sentencing guidelines are predominantly sentenced to community placement (70%). The St. Clair County jail remains overcrowded; 30 minimum-security beds in Lapeer leased by St. Clair County are fully utilized; additional beds are required from other jails. The average daily population of boarded out prisoners declined in the first quarter of FY 2000. Reductions in length of stay for targeted jail inmates has also been achieved.</p> <p>County Board approved partnership between the Sheriff and Huron House Inc., (PRC provider) to lease 27 work-pass beds at the PRC facility. This has expanded local jail capacity, improved community programming, and contributed to cost reductions. CCAMIS tracking system is now operating in a network environment and the JICS jail classification system is now available through the network in the Community Corrections Office. Probation residential, community placement, pretrial services, in jail rehabilitation program, and jail population monitoring programs/functions are fully utilized or meeting expectations.</p>	<p>As a consequence of the legislative sentencing guidelines the volume of felony and OUIL court filings have declined and probation violation dispositions are increasing. Technical probation violator dispositions now account for approximately 20% of the felony dispositions; incarceration is increasingly utilized for these cases.</p> <p>County continues to address the jail crowding through PONI process. County has completed Phase II of this program and is moving forward to implement specific recommendations provided in the Phase I report. The St. Clair County Board of Commissioners has formally established a Criminal Justice Taskforce with a mission to formulate recommendations to address jail overcrowding based on a review of system decision points (System Mapping).</p> <p>Goal remains to make JICS/CCAMIS data available to jail managers/inmate programming staff, Community Corrections office, pretrial services, and probation. Completion of this project targeted for the end of FY 2000.</p>

CCAB	FY 2000 AWARD OF FUNDS		FY 2000 STATUS	ISSUES AND/OR NOTES
	COMPREHENSIVE PLANS AND SERVICES	PROBATION RESIDENTIAL SERVICES		

St. Joseph	83,300	660,996	<p>The overall prison commitment rate was 25% in 1998, 21% in 1999, and 23% YTD in FY 2000. The rate for offenders with SGLs Min/Max 18 or less was 4% in FY 1999 and 2% YTD FY 2000. During FY 2000 the number of offenders boarded in from other jurisdictions has increased. Day reporting, implemented during late FY 1999 has increased enrollments during FY 2000. Enrollments in the self-supporting work release program established within the probation residential facility have been maintained at expected levels and have reduced this population significantly in the jail. The county has implemented cognitive programming within the probation residential facility as planned. PRS utilization is slightly under authorized level YTD FY 2000; (authorized level 42, actual 39); length of stay is higher than expected.</p>	<p>Limited progress has been made in implementing reductions in length of stay at the PRS. Day reporting services are now available for supervision of offenders terminated with a shorter length of stay, therefore, CCAB policy should be developed to address length of stay and resource efficiency issues.</p> <p>Condition stipulated with the award of FY 2000 funds to develop criteria for release of pretrial offenders to supervision by the day reporting program has been met.</p>
Thirteenth Circuit (5)	173,837	141,642	<p>The prison commitment rate declined from 35% in 1998 to 33% in FY 1999, to 28% YTD FY 2000. The rate for Min/Max of 18 or less has also declined; 12% in 1998 10% in FY 1999, and is 7% YTD 2000. The rate for OUIL IIIs was 44% in 1997, 33% in 1998, 37% in 1999, and 14% YTD FY 2000. The Grand Traverse and Antrim County jails are operating under the rated capacity. The Leelanau County jail remains crowded with offenders boarded out to other jurisdictions. The CCAB developed eligibility criteria for the Transition House to meet contract condition. Program enrollments including PRS utilization are at expected levels. The CCAB is exploring implementation of cognitive based approaches within substance abuse residential treatment.</p>	<p>The prison commitment rates for SGL Min/Max 18 or less remains higher than expected and represents departures on intermediate sanctions cell offenders. The CCAB should review the basis for departures and strengthen targeting policies and operational procedures increase utilization of community based resources for this population.</p>

CCAB	FY 2000 AWARD OF FUNDS		FY 2000 STATUS	ISSUES AND/OR NOTES
	COMPREHENSIVE PLANS AND SERVICES	PROBATION RESIDENTIAL SERVICES		

Thirty-Fourth Circuit (6)	150,000	47,214	<p>The prison commitment rate was 20% in 1997, 15% in 1999 and 14% YTD FY 2000. The OUIL III rate was 15% in CY 1999 and 9% YTD CY 2000. The overall number of dispositions was 27% less in 1999 than in 1998. Policy and program plan has had the effect of reducing jail populations, primarily through use of earned release policies and programming. Programs include community service, substance abuse treatment, sex offender counseling, day reporting, and probation residential services. Two of the county jails continue to operate below the rated design capacity and Roscommon County rents beds to other jurisdictions. The Ogemaw County jail remains crowded. The CCAB hired a new coordinator in the Fall of 1999.</p>	<p>Additional capacity exists in day reporting and the community service placement program. The CCAB needs to further review and update jail population monitor policies and procedures.</p>
Thumb Area (7)	155,130		<p>The overall regional prison commitment rate was 24% October 1999 through February 2000, straddle cell commitments were 30%, OUIL III's 19% with all of the offenders having multiple offenses beyond the third, and Man/Del<50 5%. Lapeer County's overall prison commitment rate was 24% straddle cell commitments were 22% OUIL III's 20% and Man/Del < 50 0%. Tuscola County's overall prison commitment rate was 27%, straddle cell were 39%, OUIL III's 18% and Man/Del<50 17%. 70% of the jails' populations were felons with 77% being sentenced. Both Counties were awarded FY 96 Minimum Security Facility funds; Lapeer rents 30 beds to St. Clair County. Tuscola County jail is boarding in inmates from other jurisdictions.</p> <p>The CSC program is being restructured with the intent to increase utilization. Other programs running at or below projections.</p>	<p>Commitment rates are at or about State averages, both jails have increased capacity with the ability to rent beds to other jurisdictions.</p> <p>Program utilization historically low, some improvements made over the previous year. Recent change in administrative staff.</p> <p>JPIS data submission for Lapeer County can not be provided electronically; County hand collects and submits data via snapshot basis.</p>

CCAB	FY 2000 AWARD OF FUNDS		FY 2000 STATUS	ISSUES AND/OR NOTES
	COMPREHENSIVE PLANS AND SERVICES	PROBATION RESIDENTIAL SERVICES		

Tri-County (8)	114,400		FY 2000 prison commitment rate is 8.83% (3 of 34). Of the 34 dispositions, 9 were OUIL 3 rd offenders that received jail sentences of 12 months or less. Program completion is at 84% for the community service work program. Total jail bed capacity within the region is 86; ADP during 1999 was 41.2, or 47.9% of capacity.	Prison commitment, jail utilization and program utilization objectives are being achieved. Houghton County is proceeding with plans to construct a new 70 bed jail. The existing jail and work camp would be closed centralizing housing in the new facility.
Twenty-Sixth Circuit	118,400	62,952	The overall prison commitment rate and rates for priority population groups remain well under state averages; the YTD FY 2000 overall prison commitment rate is 9% (11 of 125) and the OUIL III rate was 0%. Jails in the four county continue to operate at or under capacity and rent beds to other jurisdiction; however the Alpena County jail population has been increasing. The CSC program is operating at capacity while additional capacity exists in the substance abuse outpatient aftercare program. PRS utilization is at expected level.	The CCAB has indicated increases in sentence lengths are occurring for felony threshold cases now being sentenced in District Court in Alpena. The CCAB will be working with District Court to address the issue and developing alternative sentencing strategies.
Van Buren	106,259	47,214	The CCAB was re-activated and programs implemented during the later half of 1999. YTD 2000 the overall prison commitment rate has been 13%; the OUIL III rate was 13%; and the Min/Max of 18 or less rate 4%. The jail continues to operate at or under capacity and the weekend population has been reduced due to program enrollments in the community service/weekend work crew program. Implementation of a cognitive change program in the jail is progressing; staff have just completed training and services will be initiated during the third quarter. PRS utilization is significantly higher than bed allocation level. County is progressing is design of jail addition.	PRS planned length of stay is currently 120; policies and available alternatives should be explored to reduce length of stay and reserve PRS resources for highest risk of recidivism offenders.

CCAB	FY 2000 AWARD OF FUNDS		FY 2000 STATUS	ISSUES AND/OR NOTES
	COMPREHENSIVE PLANS AND SERVICES	PROBATION RESIDENTIAL SERVICES		

Washtenaw/ Ann Arbor	354,600	440,664	<p>County reports an FY 2000 overall prison commitment rate through February 2000 of 18%. This compares to rates of 26% in 1997 and 18% in 1998. 65 FY 2000 YTD straddle cell cases; 57% (37) were sentenced to prison. 7 presumptive prison offenses were kept locally.</p> <p>The rated design capacity of the jail was increased to 332; FY 2000 ADP of 305 through February.</p> <p>Unsentenced inmates increased from 1998 to 1999, with the sentenced population decreasing slightly from 1998 to 1999.</p>	<p>Program utilization is either over utilized(PRS) or under utilized (Day Report, Cognitive Behavior) dependant on the program.</p> <p>FY 98 Local Facility Expansion funds were awarded to County to establish new Probation Residential beds. County continues to explore options for the development and operation of the facility and program.</p>
-------------------------	---------	---------	---	---

CCAB	FY 2000 AWARD OF FUNDS		FY 2000 STATUS	ISSUES AND/OR NOTES
	COMPREHENSIVE PLANS AND SERVICES	PROBATION RESIDENTIAL SERVICES		

Wayne	3,203,600	3,399,408	<p>YTD FY 2000 overall prison commitment rate of 13% per county data; county also reports a rate of 14% for the end of FY 99; the rate was 32% in 1992, 27% in 1993, 24% in 1994, 21% in 1995, 22% in 1996, 23% during 1997, 19% in 1998. Rates for SGL and offense categories below state rates.</p> <p>Preliminary data suggests the County's prison commitment rate for offenders with guidelines in the straddle cells is approximately 31%, 14 percentage points below the state as a whole. The preliminary data also suggests the county rate for sentencing straddle cell offenders to probation (34%) is nearly 3 times the rate for the state as a whole (12%). Jail use has continued much as it has for the past year: more sentenced offenders - especially felons being housed in jail; fewer pretrial offenders - especially misdemeanors. Average length of stay for all offenders down. AJRs continue to fluctuate. PVs in jail still major concern. Jail Population Control policies in place. These policies include PSI Recommendation Guidelines and PV Processing Guidelines which still require monitoring protocols. Technical Assistance request to OCC. Overall program utilization is still lower than the goal of 90%, at an average of 78%. Quality Assurance Plan developed and instituted; first test site (Probation Detention Program) completed.</p>	<p>While progress continues to be made, several issues have not been fully resolved and new issues surface as new or improved data/information becomes available. These issues include but are not limited to overall program utilization and positive terminations being lower than expected. Issues of program utilization revolve around: awareness of program availability, practice and procedure to effectively match detainees and offenders with an appropriate response; and concerns about program quality.</p> <p>A key objective over the past few years has been to reduce the number of probation violators in jail and to eliminate releases from the jail to programs through use of the Administrative Jail Release process. It has been and continues to be expected that this objective and a corresponding increase in the use of the detention program and other programs would be met through: probation violation processing; increased use of show cause processes and reductions in the reliance on warrants; and changes in operational practices and procedures. The objectives have not as yet been met, but the potentials remain; system mapping and related procedures will be utilized during the remainder of the fiscal year to guide further modifications/refinements in process and procedures.</p>

West Central UP (10)	274,000	47,214	Prison commitment rate for the region was 19% (21 of 106) for October 1999 to January 2000. Rates for low guidelines and other priority population groups historically below state rates. Total jail bed capacity for the six counties is 250; ADP during 1999 was 171, or 68% of total capacity. Program completion is at 86.5% for the community service work program. The jail bed expansion project in Delta County, funded in part through an award of LFEP funds, was completed in February and bed utilization began in late March 2000. The 41 bed expansion increased the RDC of the jail to 87.	Of the six jails in the region, Gogebic County continues to house offenders above the RDC at 119.5%. Efforts continue among counties to reduce jail time served by targeted sentenced felons and misdemeanants through earned release and other alternatives to incarceration options. Utilization of probation residential services have increased from the authorized ADP of 3 to 4.92 per month during FY 2000.

FY 2000 Appropriation	\$13,033,000
FY 2000 Award of Funds	\$12,364,014*

***Additional awards will be made during the 3rd and 4th quarters of FY 2000. These include amendments to current awards and awards of funds to initiate programming in additional counties.**

FY 2000 Community Corrections Plans and Services funds were awarded to support community-based programs in 72 counties (44 county, city/county, or multi-county CCABs).

The Plans and Services funds are utilized within local jurisdictions to support a wide range of programming options for eligible detainees and offenders. The distribution of funds among program categories is presented below.

Resource Commitment by Program Category:

Community Service	\$1,544,684
Education	163,233
Employment/Training	360,180
Intensive Supervision	2,036,185
Mental Health	312,302
Pretrial	1,323,867
Substance Abuse	1,693,532
24 Hour Structured Supervision	41,643
Case Management	2,133,886
CCAB Administration	2,641,402
Other	113,100
Total	\$12,364,014

It is expected that the commitment of funds among program categories will change over time as increased efforts are made throughout the state to increase treatment effect.

More specifically it is expected there will, during FY 2000 and beyond, be a shifting of resource commitments to increase emphases on cognitive/behavior based and other programming for higher

risk and need cases. This is in accord with the priorities adopted in February 1999 and principles and factors which research has shown contribute to improved treatment effect and reduction in recidivism.

Some of the shifting or reallocation of resources was made during the FY 2000 award of funds process as local jurisdictions moved forward with the development and implementation of new approaches to substance abuse treatment, education and employment programming, and the implementation of process and practices which are designed to improve: case planning and sanction and service matching in accord with principles of risk, need, and responsivity; case management; and monitoring and evaluating treatment effect and impacts on criminal behavior.

Resource Commitment by Local Jurisdiction

The sanctions and services supported by FY 2000 Comprehensive Plans and Services funds within each local jurisdiction are identified on the attached Table entitled "FY 2000 Comprehensive Plans and Services - Budget Amounts for Program Services."

TABLE 4B-1

FY 2000 COMPREHENSIVE PLANS AND SERVICES FUNDS

BY CCAB/COUNTY

PART 4C

PROBATION RESIDENTIAL SERVICES

PROBATION RESIDENTIAL SERVICES

FY 2000 Appropriation	\$14,934,600
FY 2000 Award to Funds	\$14,931,492

FY 2000 funds were awarded to support residential services pursuant to 29 local comprehensive corrections plans. This compares to 13 in FY '94, 18 in FY '95 and FY '96, 27 in FY '97, and 28 in FY '98 and FY '99. The FY 2000 awards respond to utilization patterns among local jurisdictions and create greater capabilities for local jurisdictions to purchase residential services for eligible felony offenders from a wider range of providers. The FY 2000 Appropriations support an average daily population of 949.

During FY '99, emphases continued to be on: utilizing residential services as part of a continuum of sanctions and services (e.g., short-term residential substance abuse treatment services followed by outpatient treatment as appropriate, residential services followed by day reporting); reducing the length of stay in residence; and increasing the utilization of short term residential services for probation violators.

The attached chart and table provide an analysis of utilization of probation residential services during FY 2000. Thus far there has been a departure from prior year trends; previous trends indicate an increase in utilization during the first quarter with a subsequent decrease in January, and a continued increase through May, with a decrease in ADP during the summer months. However, during FY 2000 there has been a greater increase in utilization during the first quarter and an increase as opposed to decrease in January.

The increase in utilization corresponds with expectations. With the enactment of the new statutory guidelines, it was expected that greater numbers of felons would be sentenced to local sanctions and services. Additionally, it was expected that there would be greater utilization of residential and other services as a means to reduce length of stay in jail or admissions to jail. It is further expected that utilization patterns of prior years will continue through the end of the year and that the appropriation will be fully utilized.

PART 4-D

FACILITY EXPANSION PROGRAMS

PART 4-D

FACILITY EXPANSION PROGRAMS SUMMARY

Since FY 1996, \$13.0 million has been appropriated to assist local jurisdictions to reduce prison commitments or maintain low prison commitment rates by increasing local bed space capacities.

FY '96 appropriations included \$4.0 million for the Minimum Security Facilities program.

FY '98 appropriations included \$7.0 million for the Local Facility Expansion Program.

FY '99 appropriations included \$2.0 million for the Regional Jail Program.

60 proposals and applications have been submitted by local jurisdictions for the use of the funds.

- 27 for the Minimum Security Facilities program.
- 26 for the Local Facility Expansion Program.
- 7 for the Regional Jail Program.

\$10,881,335 has been awarded to provide state financial participation for 34 projects in 29 counties. The projects when completed will increase local bed space capacities by a minimum of 1,593 beds.

- \$3,995,455 was awarded per the Minimum Security Facilities program to increase capacities by 601 beds.
- \$6,293,880 has been awarded per the Local Facility Expansion Program to increase capacities by 918 beds.
- \$592,000 was awarded per the Regional Jail Program to increase capacities by 74 beds.

Four (4) counties received awards from a combination of the appropriations.

- 3 counties received awards from the MSF and LFEP appropriations.
- 1 county received awards from LFEP and RJP appropriations.

OVERVIEW OF AWARD OF FUNDS

FY 1996 MINIMUM SECURITY FACILITIES FY 1998 LOCAL FACILITY EXPANSION PROGRAM FY 1999 REGIONAL JAIL PROGRAM

MINIMUM SECURITY FACILITIES

The Fiscal Year 1996 Appropriations for corrections programs included \$4.0 million to expand local capabilities to house felony offenders. Pursuant to the provisions of the Appropriations Act, the funds were to be utilized for single county or multi-county projects which documented how an expansion of local bed space would impact prison admissions.

Twenty-seven (27) local jurisdictions submitted proposals and applications for use of the Minimum Security Facilities funds.

Of the \$4.0 million appropriated, \$3,995,445 was awarded to support 14 projects in 13 counties. Those funds provided support to increase capacities by a minimum of 601 bed space, 490 jail beds and 111 Probation Residential beds.

The majority of the projects were additions to existing jail facilities and several were renovations of existing space within the buildings. The project in Lapeer County was a joint venture with St. Clair County, which provided for a 30 bed addition to Lapeer's new jail facility for use by St. Clair County.

As of March 31, 2000, all of the projects have been completed.

Through March 31, 2000 the counties have reported expenditures totaling \$15,829,382 of which \$3,971,351 has been reimbursed of the \$3,995,445 awarded. Additional reimbursements of \$20,792 are expected to be made which will increase the total reimbursement to \$3,992,143.

Project Description and Status

Barry County	22 bed addition to the existing jail (MSF funds were utilized to finance a portion of the cost for 20 of the beds). Project was completed in November 1998. County began using the new beds in December 1998.
Dickinson County	24 bed addition (MSF funds utilized to finance a portion of the cost for 20 of the beds) to the existing jail. The project was completed in mid June 1997. Bed use began in July 1997.
Emmet County	Renovation of the basement of the jail to add 14 beds was completed in early August 1997. Use of beds began in late August 1997.
Lapeer County	30 bed addition to a new jail was completed in summer of 1998. Use of beds began in July, 1998. This is a joint venture with St. Clair County.

Macomb County	200 bed addition (MSF funds were utilized to finance a portion of the cost for 44 of the beds) to the existing jail. Construction was completed in December 1998. Use of beds began in late January 1999.
Manistee County	20 bed addition to the existing jail. Construction began in March 1997 and completed in January 1998. Use of beds began in mid February 1998.
Monroe County	The County double bunked 56 existing cells within the jail and renovated the first floor area for programming and office use. Renovations were completed in late December 1997. Use of the beds began in January 1998.
Ottawa County	162 bed addition (MSF funds utilized to finance a portion of the cost for 66 of the beds) to the existing jail. Construction was completed in November 1998. Bed use began in December 1998.
Roscommon Co.	40 bed addition (MSF funds utilized to finance a portion of the cost for 24 of the beds) to the existing jail. Construction of the housing areas was completed in early September 1997, allowing the county to utilize the new jail beds. Total project completed in November 1997.
Saginaw County	40 bed renovation to the existing jail. Renovations began in May 1997, project was completed in mid January 1998. Use of the beds began in February 1998.
Tuscola County	24 bed addition to the existing jail. Construction began in April 1997, completed mid January 1998, use of the beds began in February 1998.
Wayne County	48 bed renovation to the Division II jail, 32 beds have been in use since October 1996, the remaining 16 beds were brought on line in August 1997. Renovations to the new program areas and additional security needs completed during late summer of 1998.
	111 bed expansion of probation residential beds (100 beds for men, 11 beds for women).
	Renovations of a building, completed in August 1998, provide a 100 bed Probation Detention Center for men. Use of the beds began in September 1998.
	Renovations for 11 bed expansion of probation residential beds for women. Project began in July 1999 and was completed in December 1999. Use of beds began in January 2000.
Washtenaw Co.	84 bed addition to the existing jail. Construction began in early August 1997 and completed in December 1998. Bed use began in April 1999.

LOCAL FACILITY EXPANSION PROGRAM

The Fiscal Year 1998 Appropriations for corrections programs included \$7.0 million to expand local capabilities to house felony offenders (\$4.0 was included within the initial appropriation and \$3.0 was added during the year via Legislative transfer). Pursuant to the provisions of the Appropriations Act, the funds are to be utilized for single county or multi-county projects which document how an expansion of local bed space will impact on prison admissions.

26 local jurisdictions submitted proposals and applications for use of the Local Facility Expansion Program funds. Project proposals provided for a 1,510 increase in beds totaling \$10,983,180.

To date \$6,293,880 has been awarded for projects in 18 counties (918 new beds-798 jail beds and 120 Probation Residential beds).

Through March 31, 2000: 8 projects have been completed and are in use opening 530 new beds within the jails; 3 of the projects are under construction with expected completion by December 2000; 6 of the projects are in various stages of site selection, finalizing plans, or completing bid processes; and 1 has been canceled.

The Gogebic County Jail expansion project was canceled by the Gogebic County Board of Commissioners due to the lack of local funding for construction and future operational costs. The county was awarded \$80,000.

Reported expenditures through March 31, 2000 totaled \$14,737,536.92 of which \$2,787,135.52 has been reimbursed to the counties.

Project Status

8 projects completed through March 2000:

Cheboygan County 56 bed two phase renovation project began in late July 1998. Phase I was completed in December of 1998 adding 38 beds to the existing jail. Phase II added 18 beds for females was completed in July 1999. The increase in housing has eliminated the need for the County to board offenders in other jurisdictions; the Average Daily Population (ADP) remains below the Rated Design Capacity (RDC) of 77.

Delta County 41 bed addition to the jail began in late April of 1999. Project was completed and approved for temporary occupancy in late February 2000 pending completion of sprinkler system in basement. Utilization of the beds began in March 2000.

Genesee County	An existing building has been converted into a 100 bed Work Release Facility. Renovations and addition began in July 1999 and completed in mid January 2000. The renovated facility provides housing for work release offenders that were being housed at the main jail.
Kent County	County owned building next to the main jail was renovated to replace a 102 bed Work Release Center and increase bed availability. The RDC of the Work Release Center was originally planned for 142 beds; CJSU authorized an RDC of 150. Renovations began in August of 1999 and were completed in December 1999. County began utilization of the new center in January 2000.
Mason County	52 bed addition to the jail began in early August 1998, and completed in early January 2000. Utilization of the new beds began in January 2000.
Muskegon County	148 bed renovation project began in late October 1998. County renovated the lower floor of County Building. Project was completed in early April 1999. The increase in housing has eliminated the need to house offenders out of county.
Saginaw County	63 bed addition to the jail began in late July 1998. Project was completed in early March 1999.
St. Joseph County	16 bed renovation project of the jail began in June 1998 and was completed in late December 1999. The RDC of the of the new housing area was originally planned for 16 beds, CJSU authorized 22 beds, increasing the RDC of the jail to 165. Utilization of the beds began in February 2000.

3 are under construction:

Charlevoix County	64 bed addition to the jail began in April 1999, completion expected by June 2000.
Chippewa County	64 bed addition to the jail began in August of 1999. Project is more than 60% complete with a projection for utilization by December 31, 2000.
Monroe County	Site development for the 160 bed facility began in October of 1999. The installation of the underground utilities, footings, and concrete floors were completed to accommodate the erection of the buildings. County expects project to be completed by July 2000.

6 are in developmental stages:

- 6 projects that are in various stages of confirming site selection, finalizing plans, or having bidding documents prepared and approved for the final bid process at the County level and/or approved by County Jail Services Unit.

Grand Traverse County

Kalamazoo County

Huron County

Oakland County

Ingham County

Washtenaw County

and 1 has been canceled:

- The 10 bed expansion project of the Gogebic County Jail was canceled by the Gogebic County Board of Commissioners due to the lack of local funding for construction and future operational costs.

TOTAL		918	\$6,213,880	\$2,787,135	\$3,426,745

Balance of Project Account \$ 786,120.00

* County was awarded \$80,000 pursuant to a proposed jail expansion project; project has since been canceled by the County board of Commissioners.

REGIONAL JAIL PROGRAM

The FY 1999 Appropriations for corrections programs included \$2.0 million for the Regional Jail Program.

Unlike the Minimum Security Facilities and the Local Facility Expansion Programs which allowed for single or multi-county projects, the Regional Jail Program is restricted to multi-county projects.

Applications for funds were to clearly identify and document how and when the expansion in jail bed space would either reduce prison commitment rates of targeted felony offenders or maintain prison commitment rates below the state average among the participating counties.

Seven (7) local jurisdictions submitted proposals and applications for use of the Regional Jail Program funds. Project proposal provided for a 452 bed increase and requests for funds totaling \$3,616,000.

Of the 7 proposals, 4 requested funds to expand housing capacities at existing jails, while 3 were planning the construction of new facilities. Estimated project costs for the 7 projects totaled \$30,540,697.

\$592,000.00 was awarded for 2 projects which would increase bed capacities by a minimum of 74 beds.

Project Status

Mason County

- Construction has been completed. Program implementation and utilization of the beds began in February 2000.
- The county is providing a structured 90 day in-jail Regional Substance Abuse Program for sentenced felony offenders who would normally be sentenced to prison or lengthy jail term.
- Neighboring counties through inter-county agreements refer eligible offenders with histories of substance abuse and treatment needs for housing at the Mason County Jail. Follow up treatment is provided in the county of residence following release from the Mason County facility.
- Currently Lake and Oceana County are participating. Plans are being formulated with Manistee, Wexford, Muskegon and other Counties.

Van Buren County

- County will provide housing for sentenced offenders from Berrien County specifically those within the straddle cells. This will allow for improved jail utilization and a reduction in prison commitments for Berrien County while maintaining Van Buren's low prison commitment rate.

Programs will be offered for all sentenced offenders to include extensive treatment for substance abuse, education, life skills, and employment coordinated within the local jurisdictions supervision and follow-up.

- Construction blueprints of the project have been finalized and submitted to the Michigan Department of Consumer and Industry Services, Office of Fire Safety and County Jail Services Unit for review. Pending their approval, the County projects construction of the 50 bed addition to the existing jail to start in May of 2000.

REGIONAL JAIL PROGRAM PROJECTS

FISCAL SUMMARY

Through March 31, 2000

COUNTY	CONTRACT DURATION	# OF BEDS	CONTRACT AMOUNT	PAYMENTS	CONTRACT BALANCE
Mason	07-20-99 - 09-30-00	24	\$192,000.00	\$192,000.00	\$0.00
Van Buren	08-23-99 - 09-30-01	50	\$400,000.00	\$0.00	\$400,000.00
	TOTALS	74	\$592,000.00	\$192,000.00	\$400,000.00

PART 5

DATA SYSTEMS STATUS

PART 5

DATA SYSTEMS STATUS

The Office of Community Corrections is responsible for the development of two information systems: the Jail Population Information System (JPIS) and the Community Corrections Information System (CCIS). This report summarizes the status of each system.

JAIL POPULATION INFORMATION SYSTEM (JPIS)

OVERVIEW:

The Michigan Jail Population Information System is the product of a cooperative effort among the Michigan Department of Corrections Office of Community Corrections and County Jail Services Unit and Michigan Sheriff's Association, with assistance from Michigan State University and the National Institute of Corrections.

Following is a condensed segment on mission and objectives for the JPIS system, as defined by this group, and as included in the overview section of the JPIS user manual. Text that has been shortened for the sake of brevity is marked by ellipsis points (...).

MISSION

The mission of the statewide Jail Population Information System is to provide an information reporting system that enables coherent policy making. The primary concern is the ability to monitor and evaluate jail population characteristics for use in statewide policy planning. The statewide database system must be sufficiently flexible to enable the system to be compatible with existing jail management and MIS systems. The major data categories required for this information system are related to: inmate profiles, inmate classification, inmate programs, the number of inmate admissions, and the length of the stay.

GOALS/OBJECTIVES

1. To assist state and local decision makers in correctional policy and planning by providing data/information on: selected offender target groups for population management; security and custody levels for use in determining facility design and capacity; and, local detention operations for enforcement and revision of existing standards.
2. To assist state and local decision makers in the development and approval of comprehensive community corrections plans by providing comparable information on sanctions and services...
3. To identify the impacts of current and proposed state statutes on the utilization of jail confinement space through analysis of shifts in the number and types of offenders confined.

4. To provide policy decision makers with relevant information and data for more efficient use of confinement facilities on a statewide basis.
5. To provide information/data to identify the availability of community corrections programs and services in local jurisdictions and assist in the prioritization of initiatives by OCC.
6. To provide policy relevant information/data to the Legislature, legislative agencies, Department of Corrections... (and various other state and local agencies.)
7. To describe the utilization of local jails to identify trends in the offender profile information....
8. To develop reports from selected individual and aggregate data elements....

Several key points in the preceding overview and in other JPIS documentation are worthy of additional emphasis and clarification.

Not a “Local” System:

First and foremost, JPIS is a means to gather a subset of the information which already resides on individual jail management systems in individual counties. There is no “JPIS System” per se that exists in any county. Each county periodically runs an extract process which assembles, from the local jail management system, a JPIS record(s) for any person who spent any time in general housing during the extract period.

Measures Incarcerations:

JPIS is intended to gather information about individual incarcerative periods in order to plan for optimum jail utilization and to assess the impact of policy decisions on jail populations. It was not intended to identify or track specific individuals.

The JPIS record itself is composed of a series of data items which were initially agreed upon by a cross-section of county and state parties. **The primary approach taken was to try to promote the adoption, enhancement and proper use of local systems, which in turn would provide the foundation to extract the optimum amount of usable data for JPIS.** As was stated in the overview, it was never intended that JPIS would contain all the information contained at each individual reporting site.

HISTORICAL:

The JPIS system was originally developed to run on the DOC mainframe. Counties were intended to send files by modem for mainframe processing. This worked well for a few counties, but the communication software was often difficult to configure locally and prone to problems whenever routine system changes occurred. In addition, the mainframe query tool--though reasonably powerful--made data usage cumbersome.

When DOC mainframe applications were moved to centralized state sites, the JPIS system was moved in-house to OCC. A bulletin board (BBS) was set up to accept electronically transmitted files using modems and conventional communication software. The edit process was rewritten to run on a networked PC, with error reports posted back to the BBS for download by the counties.

JPIS IMPACT

OCC staff has always stressed that the JPIS file should be viewed as a logical by-product of a well-managed local data system. This locally-centered approach has had a substantial impact on the utilization of local jail management systems.

The JPIS requirement for standardized classification of offenders has been a major factor in the adoption of objective inmate classification processes and procedures among Michigan jails. Additionally, many counties have implemented new jail management systems, while others have made dramatic changes in their JMS system. Obviously, there have been other forces driving some of these changes, such as liability concerns and sharper political focus--but JPIS has very measurably advanced local usage of both jail management software and offender classification.

STATUS:

Before data can be utilized or improved, it must first be acquired. Counties submit JPIS data electronically or through paper reports. OCC has placed the emphasis on acquiring the data electronically: the data is more complete and detailed, and creates the ability to use the data to respond to ad hoc questions and issues. Until the capability is established to transmit complete data electronically, counties submit the jail utilization and offender profile data via paper reports. With specific reference to the electronic submission of JPIS data, acquisition of useable electronic data has been and continues to be dependent upon several factors:

- 3) The jail must have an automated jail management system, including classification.

Virtually every county now has an automated jail management system (JMS), with many counties working on, or having completed upgrade projects which incorporate JPIS reporting capabilities and better classification procedures.

- 4) An extract process must be implemented to transform local elements into JPIS format.

In addition to over a dozen JMS vendors, a sizeable number of counties run custom in-house systems--each gathering data differently to meet local needs. Most software vendors serving multiple counties have now written extract processes to generate JPIS files. OCC staff continue to work with the handful of counties that have not yet completed the local system enhancements to facilitate electronic submission of JPIS data.

- 5) Data must be consistent and pass initial edit checks.

Staff must be consistent about data entry in order to reach and maintain an accuracy level where 5% or less of their JPIS records contain any edit errors. Depending upon staffing, past practices and specifics of the JMS, time frames can vary widely for this step. OCC tries to assist in whatever way possible.

- 6) Data analysis drives refinement of local systems, and begins to provide policy data:

OCC is now focusing efforts on generating reports from JPIS data, and subsequently working with the counties to verify that the data included in JPIS files does in fact represent actual local conditions.

PLANS & FOCUS

Most counties throughout the state have reached the point at which they are capable of gathering and submitting electronic jail data, although the specific capabilities vary across the individual counties and across the various data systems employed. It is, however, a very dynamic environment, with frequent changes in local personnel, upgrades to hardware software, and occasional system crashes. The continuing challenge is to assist counties with any situations that adversely affect existing data collection and submission, while trying to assure the advancement of capabilities at those counties which are still struggling to establish and stabilize their data submissions. As the number of counties transmitting regular JPIS data has grown, efforts have been redirected, as much as possible, toward increasing the level of data analysis, report generation and local feedback. Although recent problems with several vendors have required immediate attention, the focus will continue to be on increasing the analysis and usage of JPIS data on a variety of fronts.

JPIS DATA REPORTING:

Although each county is unique, and any given county can encounter occasional difficulties, the following summation and detail attempt to give an accurate summary of reporting on JPIS data:

NUMBER OF COUNTIES: 83

NUMBER OF JAILS: 81

TYPES OF DATA SUBMISSION BY JAILS

Transmitting Electronically: 75 (93%)

9 counties have fallen substantially
behind in submitting data electronically.

Not Transmitting Electronically: 6 (7%)

(See individual status reports)

Initial test files sent: 5

Transmitting only paper reports: 1

This county is working on
developing electronic submission
according to an accepted work plan

Recent Status and Activity:

Progress continues in securing accurate, timely jail data from the 81 counties with jails. This positive movement has been occurring in the midst of substantial problems at two major jail software vendors. Sheriff's Jail Linkage System, the software provider for a large number of small-to-midsize jails, dissolved its relationship with its primary software subcontractor. This caused uncertainties about support at existing customer sites and delayed progress at sites undergoing software conversions. In addition, a jail software upgrade by New World Systems introduced a JPIS file format problem that prevented New World clients from submitting useable data for several months while fixes were being implemented. In spite of the resultant impact of these problems on small and midsize counties, data submission was restored at most sites, while several additional counties, such as Kent, Genesee, Bay and Jackson made advances and are now sending regular production data.

The following counties are transmitting data electronically (some individual notes follow):

Alcona ¹	Clare ²	Ingham ¹	Macomb	Osceola ¹
Alger ¹	Clinton ¹	Iosco ¹	Manistee ²	Otsego
Allegan ¹	Crawford	Iron ¹	Marquette	Ottawa ¹
Alpena ¹	Delta ¹	Isabella ²	Mason ²	Presque Isle ¹
Antrim ¹	Dickinson ²	Jackson	Mecosta ²	Roscommon ¹
Baraga	Eaton ²	Kalamazoo	Menominee ¹	Saginaw ²
Bay	Emmet	Kalkaska	Midland ²	St. Clair ²
Benzie ²	Genesee	Kent	Missaukee ¹	St. Joseph ¹
Berrien ¹	Gladwin ¹	Keweenaw ¹	Montcalm ¹	Sanilac ¹
Branch ¹	Gogebic ¹	Lake ¹	Montmorency ¹	Schoolcraft ¹
Calhoun ²	Grand Traverse	Lapeer ²	Muskegon ¹	Tuscola ¹
Cass ²	Gratiot ¹	Leelanau ²	Newaygo ¹	Van Buren ¹
Charlevoix ¹	Hillsdale ¹	Lenewee ¹	Oakland ²	Washtenaw ¹
Cheboygan	Houghton	Livingston ¹	Ogemaw ¹	Wayne ¹
Chippewa ¹	Huron	Mackinac	Ontonagon ¹	

¹ Positive response to latest audit survey - data reported satisfactorily reflects jail utilization.

² Response to latest audit survey indicates some follow up required.

Recent Additions to Above List, or Problem Resolutions:

Allegan	After vendor fix, submitted missing months and is again submitting regularly.
Bay	Began production data submission with October 99 file.
Genesee	Sending regular production data, with data spanning April 99 to present.
Jackson	County has progressed from test status to full production transmission.
Kent	County now sending regular JPIS files in spite of complex extraction process.
Macomb	Resolved record selection problem and resubmitted all 98 and 99 data.
Wayne	Recently sent several catchup files promptly after completing major system changes.

Current Issues with Transmitting Counties:

County	Jail Software	Notes/Status
Benzie	Accucomp (from LES)	County has struggled to maintain data flow due to system problems and has fallen substantially behind due to uncertainty about change to new jail software. County recently began using Accucomp jail software, but must work with new vendor to resolve a lingering problem with offense coding. County also in contact with Wexford county, the other Accucomp client.
Cass	CLUES	After a problem with the monthly record selection process was noted county began retransmitting some 99 data. Transmissions currently on hold while county awaits response from vendor to remaining extraction issue.
Clare	Lockdown (replacement in process)	County had severe problems generating data files with their aging data system. Recent upgrades should alleviate most problems, but some on-site work with county is still anticipated to determine what back data can be extracted. June 30 is the target for full restoration of normal data flow.
Crawford	FSG (wasNwWd)	After extended problems related to a system crash and personnel upheavals, county has made switch to FSG jail software, and restored transmissions.
Gogebic	JAMIS	County has struggled periodically with file generation and transmittal and is currently behind. OCC will continue to assist as time permits.
Huron	FSG	County normally sends regularly, but recent problems with corrupted extract files have prevented some updates until missing months can be filled in. Issue should be resolved shortly and presents no real problem.
Kalamazoo	GEAC	Somewhat erratic transmissions and error resolution moving slowly.
Shiawassee	OSSI	Shiawassee has a newly established Community Corrections Advisory Board and their new vendor, OSSI, recently began submitting test files after developing a JPIS extract capability.
Montmorency	FSG	After experiencing problems with file creation and transmittal, county is undergoing a full system upgrade, along with some vendor-supplied training. Restoration of transmissions has taken longer than expected; OCC will continue to make assistance available to county.

** “LES” represents the original jail management product distributed by Sheriff’s Jail Linkage System, or any similar variant provided subsequently by other parties. Several LES counties have vendor changes in process.

Counties Still in Test Mode or Without Submissions for Extended Period of Time.

County	Jail Software	Notes/Status
Arenac	LES **	Fell substantially behind during local personnel changes and problems related to vendor's legal problems. Arenac staff attended OCC training session, but some on-site work still required. Some permanent data loss still expected, due to incomplete data entry during problem period.
Barry	LES **	After a severe hardware crash, substantial jail data was permanently lost, and county lost ability to create JPIS extract files. Vendor's legal entanglements made software rights and support obligations unclear. In December, county sent first test file from upgraded local system, but not clear at this point how much prior data may be salvaged. OCC staff will assist the county in salvaging useable data from the missing time frame and move toward restoration of regular data flow by the end of July.
Ionia	New World	After prolonged stoppage, county resumed transmission with a couple of test files, and is currently sending prior 99 data. County continues to discuss with their vendor the best way to correct their offense coding table, which still adversely affects JPIS extracts. County is expected to be current by end of July.
Monroe	LES **	Monroe county reports that they are nearing operational status with their new Jail Management vendor, but that JPIS extract capability is not expected to be added before mid-year. OCC will continue to provide technical assistance the vendor and/or the county to facilitate development. County continues to submit summary reports on paper in the interim.
Oceana	JAMIS	After an extended period without electronic data submission, county again submitted test data, which had an high error level. Planned on-site assistance has not yet been arranged, but is now targeted for the May/June time frame. Although error reduction will take some work, no large obstacles are foreseen to getting county back on board with regular submissions. Some prior recovery expected.
Wexford	Accucomp	County has been submitting regular JPIS data, but due to unresolved offense coding issue with vendor, data is not yet being run into the normal production data base. Recent adoption of Accucomp by Benzie county should aid resolution.

* Note that Luce and Oscoda counties do not have jails.

** "LES" represents the original jail management product distributed by Sheriff's Jail Linkage System, or any similar variant provided subsequently by other parties. Several LES counties have vendor changes in process.

USES OF JPIS DATA:

As increasing numbers of counties transmit jail utilization and offender profile data on a regular basis, the focus is on improving and/or maintaining data quality (complete, accurate and timely data) and utilizing data for monitoring patterns and trends within and among counties, issue identification and resolution, and evaluation. This is reflected in FY 99 work activities and in FY 2000 work plans of OCC staff.

The monthly edit error reports returned to the counties include summaries, based upon the incoming file, of admissions, releases, and unreleased inmates by reported security class. These reports enhance capabilities to review each monthly submission for accuracy.

Section 2 of this biannual report reflects the planned use of JPIS data, including a quarterly report and a special ad hoc report based upon questions about length of stay for sentenced felons. A management report on jail utilization is included in the Appendix D for JPIS and is produced quarterly.

Detailed reports were mailed to each sheriff's department and CCAB during 1998, 1999, and early 2000, based upon accumulated JPIS master data. These provided breakdowns by categories such as admit/release, length-of-stay, and average daily population. The latest reports utilized the data available for 1998 and included the accumulated data through December 1999. In addition, an audit response sheet was included that requested feedback on how well the different reports represented the jail population. These reports provide one of the primary tools for on-site review of JPIS statistics with the counties to isolate and correct data problems not readily identified by the routine file edit process. As any additional data problems are identified and resolved, the quality and confidence in the reports will increase.

COMMUNITY CORRECTIONS INFORMATION SYSTEM (CCIS)

OVERVIEW:

Local jurisdictions submit offender profile and program utilization data to OCC monthly. The data may be submitted either on floppy disk or by e-mail. In recent months, e-mail submission of data files has doubled, so that now about half of the CCABs submit by this method.

The data represents an extract from the data available locally for program planning and case management purposes. OCC uses the information to monitor profiles of detainees or offenders determined eligible to participate in programs and the placement of offenders in programs according to each CCAB's eligibility criteria. Two types of data are required: (1) characteristics of offenders who have been determined P.A. 511 eligible and enrolled in programs; and (2) program participation details.

CCIS DATA BASE:

The CCIS data requirements are currently much more minimal than the JPIS requirements. As felony offenders are increasingly sentenced to shorter periods of incarceration and to more community-based sanctions, additional data reporting requirements may become necessary in order to improve monitoring of offender profiles and the use of the several community-based sanctions and services by profile(s) of offenders.

CCIS data is currently being reviewed to ensure the data is complete and accurate and that the data can be used for expanded analysis. This involves improvements in the internal review and use of the data and an increase in the frequency of feedback to local CCABs. The focus is on facilitating the improvement of data quality and promoting the ongoing use of the data by OCC and local jurisdictions to monitor patterns and trends in program utilization and enrollee profiles.
